Chief Customer Officer 2.0 Jeanne Bliss 2015-06-15 5 Leadership Competencies To Build Your Customer-Driven Growth Engine Chief Customer Officer 2.0 is a hands-on resource packed with tools for Chief Customer Officers and leadership to work together to earn customer-driven growth. A sequel to the 2006 classic Chief Customer Officer, this new update, with over 90 percent new material, is based on Jeanne Bliss's twenty-five years of extensive experience as a Chief Customer Officer, and her work coaching Chief Customer Officers and executive teams for the past ten years. Chief Customer Officer 2.0 is based on a five-competency framework that successfully launched multitudes of Fortune 100 and Fortune 500 companies through their customer experience transformations. The framework addresses the issues that remain prominent, including siloed organizations and the need for clear goals and metrics, as well as new factors, like social media, that have altered the customer relations dynamic forever. You'll learn the five key competencies embraced by world-class leaders and the role of the Chief Customer Officer in uniting the organization to build and embrace these new competencies. This book provides practical guidance on how to make those competencies part of the way your company develops products, goes to market, enables and rewards people, and conducts annual planning. The discussion includes an exploration of what goes wrong in companies that stumble, so you can sidestep their mistakes and avoid their fate. By embracing employees and customers, and delivering an experience they want to have again, you'll pave the way for lasting success and drive better business decisions. Over the past decade, consumers have gained unprecedented power to speak out directly, forever changing the way companies relate to their customers. The customer experience has become a major driving force behind business growth, and this book provides a framework for making it a part of every aspect of doing business. Treat your customers like the assets they are Craft a more comprehensive customer care strategy Avoid the common pitfalls that cause major damage Unify the company around the customer experience With concrete, practical advice updated for the changing consumer landscape, Chief Customer Officer 2.0 is an essential resource for every leader accountable for the customer experience.

New Frontiers of the Automobile Industry Alex Covarrubias V. 2019-11-28 Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

"I Love You More Than My Dog" Jeanne Bliss 2009-10-15 Hundreds of businesses have customers who admire them, but only an elite few have true advocates—passionate, loyal, vocal fans—who rave about them to anyone who will listen. Jeanne Bliss, who served as a senior customer executive at five major companies, says there's no shortcut to becoming beloved—you can't hire a fancy marketing firm to get there. You earn it by how you decide to run your business—as Wegman's and Harley-Davidson have for decades and as relatively new companies like Zipcar and Zappos are doing right now. After studying and working with dozens of beloved companies, Bliss has identified five key decisions that lead to customer devotion: • Decide to believe • Decide with clarity of purpose • Decide to be real • Decide to be there • Decide to say "sorry" Her examples and advice will help readers sustain growth and profit even in a tough economy.

Chief Customer Officer Jeanne Bliss 2011-01-06 Drawing on her first-hand experience at top companies as diverse as Lands' End and Microsoft, Jeanne Bliss explains why even great corporations can drift to delivering mediocrity to customers, and she offers a proven solution to break the cycle. Different divisions and departments in corporations can fail to communicate and act as a team—they create silos instead of a superior customer experience. Jeanne Bliss shows in stark detail how profits suffer when businesses focus on their organizational charts and not their customer relationships. This book provides leaders the tools and information they need to overcome organizational inertia and deliver a meaningful customer experience. The author includes diagnostics to determine if a company's core strengths, metrics, and systems improve or harm customer relationships. With all these tools, leaders can address the organizational challenges they face with an exhaustive review of the Chief Customer Officer role and an evaluation to determine the right solution for their culture and company.

The Car Hacker's Handbook Craig Smith 2016-03-01 Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Would You Do That to Your Mother? Jeanne Bliss 2018-05-08 Customer experience pioneer Jeanne Bliss shows why "Make Mom Proud" companies outperform their competition. Her 5-step guide to customer experience and culture transformation makes this achievement possible. Bliss urges companies to make business personal to earn ardent fans and admirers, by focusing on one deceptively simple question: "Would you do that to your mother?" "Make Mom Proud" companies give customers the treatment they desire, and employees the ability to deliver it. They turn "gotcha" moments into "we've got your back" moments by rethinking business practices, and they enable employees to be part of the solution to fix customer frustrations. Bliss scoured the marketplace seeking companies who excel at living their core values, grounded in what we all learned as kids. She offers a five-step plan for evaluating your current behaviors and implementing actions at every level of the organization. Step 1. "Be the Person I Raised You to Be" Understand how you are hiring, developing and trusting employees to bring the best version of themselves to work. Vail resorts, for example, the world's largest ski resort operator, banned the three words "Our policy is..." from their vocabulary, freeing employees to take spirited actions to deliver "the experience of a lifetime." Step 2. "Don't Make Me Feed You Soap" Learn the eight key frustrations that bind us as customers (waiting, fear, anxiety, the black hole of no communication, etc.) and how to apply actions from companies who are delivering a seamless, frictionless and easy experience. Step 3. "Put Others Before Yourself" Determine if your focus is on helping customers achieve their goals - and evaluate how that is fueling your growth. Canada's Mayfair Diagnostics, for example, spent over a year studying the emotions of patients entering an imaging clinic, so they could redesign their welcome to deliver warmth and caring over procedure and process. The newly designed clinic achieved profitability in record time. Step 4. "Take the High Road" Learn how companies who do the right thing rise above the competition. Virgin Hotels, for example, named #1 U.S. hotel by Conde Nast Reader's Choice Awards, walked away from price gouging at the mini bar, so you'll never pay more for that Snickers bar than what you'd pay at the corner market. Step 5. "Stop the Shenanigans!" Evaluate your current company behaviors and identify the key actions that you can begin immediately. With 32 case studies and examples from more than 85 companies, this is a practical and easy to follow guide for your experience and culture transformation. Filled with comics to snapshot our experiences as customers, a "mom lens" to reflect continuously on your performance, and a "make-mom-proud-ometer" quiz - the book makes Bliss's approach accessible and approachable. Join the movement to #MakeMomProud by applying this book across your organization. Whether you're contemplating your company's returns policy, its social media presence, or its big-picture strategy, this approach will help your company anticipate both employee and customer needs, extend patience, and show respect at all times.

Mustang by Design James Dinsmore 2018-09-14 p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT,

Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

Tilt Niraj 2013-10-15 Shift your strategy downstream. Why do your customers buy from you rather than from your competitors? If you think the answer is your superior products, think again. Products are important, of course. For decades, businesses sought competitive advantage almost exclusively in activities related to new product creation. They won by building bigger factories, by finding cheaper raw materials or labor, or by coming up with more efficient ways to move and store inventory—and by inventing exciting new products that competitors could not replicate. But these sources of competitive advantage are being irreversibly leveled by globalization and technology. Today, competitors can rapidly decipher and deploy the recipe for your product's secret sauce and use it against you. "Upstream," product-related advantages are rapidly eroding. This does not mean that competitive advantage is a thing of the past. Rather, its center has shifted. As marketing professor Niraj Dawar compellingly argues, advantage is now found "downstream," where companies interact with customers in the marketplace. Tilt will help you grasp the global nature of this downstream shift and its profound implications for your strategy and your organization. With vivid examples from around the world, ranging across industries and sectors, Dawar shows how companies are reorienting their strategies around customer interactions to create and capture unique value. And he demonstrates how, unlike product-related advantage, this value is cumulative, continuously building over time. In an increasingly customer-centered world marketplace, let Tilt serve as your guide to shifting your strategy downstream—and achieving enduring competitive advantage.

Lead-Acid Batteries for Future Automobiles Jürgen Garcke 2017-02-21 Lead-Acid Batteries for Future Automobiles provides an overview on the innovations that were recently introduced in automotive lead-acid batteries and other aspects of current research. Innovative concepts are presented, some of which aim to make lead-acid technology a candidate for higher levels of powertrain hybridization, namely 48-volt mild or high-volt full hybrids. Lead-acid batteries continue to dominate the market as storage devices for automotive starting and power supply systems, but are facing competition from alternative storage technologies and being challenged by new application requirements, particularly related to new electric vehicle functions and powertrain electrification. Presents an overview of development trends for future automobiles and the demands that they place on the battery Describes how to adapt LABs for use in micro and mild hybrid EVs via collector construction and materials, via carbon additives, via new cell construction (bipolar), and via LAB hybrids with Li-ion and supercap systems System integration of LABs into vehicle power-supply and hybridization concepts Short description of competitive battery technologies
