*Gen, Organic and Biochemistry Lab Manual* Hoffmann 1998-12-01

**Fundamental Laboratory Approaches for Biochemistry and Biotechnology** Alexander J. Ninfa 2009-05-26 Ninfa/Ballou/Benore is a solid biochemistry lab manual, dedicated to developing research skills in students, allowing them to learn techniques and develop the organizational approaches necessary to conduct laboratory research. Ninfa/Ballou/Benore focuses on basic biochemistry laboratory techniques with a few molecular biology exercises, a reflection of most courses which concentrate on traditional biochemistry experiments and techniques. The manual also includes an introduction to ethics in the laboratory, uncommon in similar manuals. Most importantly, perhaps, is the authors' three-pronged approach to encouraging students to think like a research scientist: first, the authors introduce the scientific method and the hypothesis as a framework for developing conclusive experiments; second, the manual's experiments are designed to become increasingly complex in order to teach more advanced techniques and analysis; finally, gradually, the students are required to devise their own protocols. In this way, students and instructors are able to break away from a "cookbook" approach and to think and investigate for themselves. Suitable for lower-level and upper-level courses; Ninfa spans these courses and can also be used for some first-year graduate work.

**Biochemistry and Biomedical Sciences OER Laboratory Manual** Felicia Vulcu 2021 This OER highlights a laboratory manual for an undergraduate level 2 Biochemistry laboratory course. The lab manual consists of eleven laboratory experiments immersing students in a directed research project centered on the overarching theme of drug discovery. Namely, we have chosen to highlight the drug target E. coli dihydrofolate reductase. This protein was selected due to its ease of expression/purification and its rich research history as a drug target. Although our protein choice is not unique, we feel it is ideal for introducing students to the research process, enhancing active learning and allowing us to create a safe, nurturing lab environment conducive to dialogue.The lab manual is divided into chapters that span the entirety of laboratory experiments we conduct in the course. Each chapter is divided into: "background information" and "protocols". We have also embedded videos and interactive components throughout the OER.Finally, this resource also boasts an "instructor resources" chapter. This chapter highlights our unique approach to lab course delivery. Here, we sketch out the use of Team Think Tanks to immerse students in experimental design, critical data analysis, and communication skills (written and oral). We even infuse a bit of theater in our course with impromptu speaking!
