Asian Patients in Hospital and at Home Alix Henley 1979 Hospital and community health services in nearly every large town in Britain are now caring for Asian patients from India, Pakistan, Bangladesh and East Africa.

At an individual level many health workers find it difficult to understand and to cater for the particular needs and expectations of their Asian patients. This is frequently because they have no reliable information to work from and

so cannot know what their patients need. In addition, because they are working across barriers of culture and language they may themselves find their work more difficult and less satisfying. They may be working under increased pressure. This book aims to fill some of the information gaps. Asian families at home, in Britain. Religion, sickness and health. Home visits. Mothers and babies. Names. Personal hygiene. Clothes, jewellery and makeup. Food. The language barrier. Asian language. Interpreters.

Handbook IMCI World Health Organization. Department of Child and Adolescent Health and Development 2005 This handbook gives a detailed explanation of the WHO/UNICEF guidelines for the integrated management of childhood illness

(IMCI). The guidelines set out simple and effective methods for the prevention and management of the leading causes of serious illness and mortality in young children. They promote evidence-based assessment and treatment using a syndromic approach that supports the rational, effective and affordable use of drugs. The handbook gives an overview of the IMCI process and includes technical guidelines to assess and classify a sick young infant aged from one week up to two months, and a sick young child aged two months to five years; as well as guidance on how to identify treatment; communicate and counsel; and give follow-up care. *The Challenge of Slums* United Nations Human Settlements Programme 2012-05-23 The Challenge of Slums presents the first global assessment

of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by

municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations around the world.

Preventing Suicide Who 2015-01-31
"Suicides are preventable. Even so, every 40 seconds a person dies by suicide somewhere in the world and many more attempt suicide. Suicides occur in all regions of the world and throughout the lifespan. Notably, among young people 15-29 years of age, suicide is the second leading cause of death globally. Suicide impacts on the most vulnerable of the world's populations and is highly prevalent in already marginalized and discriminated groups of society. It

is not just a serious public health problem in developed countries; in fact, most suicides occur in low- and middle-income countries where resources and services, if they do exist, are often scarce and limited for early identification, treatment and support of people in need. These striking facts and the lack of implemented timely interventions make suicide a global public health problem that needs to be tackled imperatively. This report is the first WHO publication of its kind and brings together what is known in a convenient form so that immediate actions can be taken. The report aims to increase the awareness of the public health significance of suicide and suicide attempts and to make suicide prevention a higher priority on the global public health agenda.

It aims to encourage and support countries to develop or strengthen comprehensive suicide prevention strategies in a multisectoral public health approach. For a national suicide prevention strategy, it is essential that governments assume their role of leadership, as they can bring together a multitude of stakeholders who may not otherwise collaborate. Governments are also in a unique position to develop and strengthen surveillance and to provide and disseminate data that are necessary to inform action. This report proposes practical guidance on strategic actions that governments can take on the basis of their resources and existing suicide prevention activities. In particular, there are evidence-based and low-cost interventions that are effective,

even in resource-poor settings. This publication would not have been possible without the significant contributions of experts and partners from all over the world. We would like to thank them for their important work and support. The report is intended to be a resource that will allow policy-makers and other stakeholders to make suicide prevention an imperative. Only then can countries develop a timely and effective national response and, thus, lift the burden of suffering caused by suicide and suicide attempts from individuals, families, communities and society as a whole." -Preface, page 03.

The Stinking Rose Sujata Bhatt 1995
The Stinking Rose is one of the names for a plant that arouses strong feelings: garlic. No one is neutral about it. Sujata Bhatt explores the various mythologies and the magical and practical aspects of garlic in a sequence of twenty-five parts, is also haunted by places, especially Vancouver Island (where the author lived and worked for six months), and by her native India. Europe is also

present, a place of sometimes reluctant abode. There is a dialogue between new worlds and old, intensifying towards the end of the volume in a series of experimental poems, building on the experience of those celebrated earlier 'bilingual' poems which bring Gujarati and English together.

The Parsi Mind Jer Dara Randeria 1993
Election Law Landmark Publications
2021-09-25 THIS CASEBOOK contains a selection of U. S. Court of Appeals decisions that analyze and discuss issues stemming from election law. Volume 2 of the casebook covers the Sixth through the Eleventh Circuit Court of Appeals. The timing of election litigation matters. "[A]ny claim against a state electoral procedure must be expressed expeditiously." *Fulani v. Hogsett*,

917 F.2d 1028, 1031 (7th Cir. 1990) (citing *Williams v. Rhodes*, 393 U.S. 23, 34-35, 89 S.Ct. 5, 21 L.Ed.2d 24 (1968)). The Supreme Court underscored this precise point in [. . .] *Republican Nat'l Comm. v. Democratic Nat'l Comm.*, ___ U.S. ___, 140 S. Ct. 1205, 1207, 206 L.Ed.2d 452 (2020). The Court's direction was clear: federal courts should avoid announcing or requiring changes in election law and procedures close in time to voting. Doing so risks offending principles of federalism and reflects an improper exercise of the federal judicial power. Even more, belated election litigation risks giving voters "incentive to remain away from the polls." *Purcell v. Gonzalez*, 549 U.S. 1, 5, 127 S.Ct. 5, 166 L.Ed.2d 1 (2006); see also *Crookston v. Johnson*, 841 F.3d 396,

398 (6th Cir. 2016) ("Call it what you will-- laches, the Purcell principle, or common sense--the idea is that courts will not disrupt imminent elections absent a powerful reason for doing so."). On this reasoning, we have rejected as late claims brought too close in time before an election occurs. See *Democratic Nat'l Comm. v. Bostelmann*, 977 F.3d 639, 642 (7th Cir. 2020); *Jones v. Markiewicz-Qualkinbush*, 842 F.3d 1053, 1060-62 (7th Cir. 2016); *Navarro v. Neal*, 716 F.3d 425, 429 (7th Cir. 2013). The same imperative of timing and the exercise of judicial review applies with much more force on the back end of elections. Before a court can contemplate entering a judgment that would void election results, it "must consider whether the plaintiffs filed

a timely pre-election request for relief." *Gjersten v. Bd. of Election Comm'rs*, 791 F.2d 472, 479 (7th Cir. 1986) (emphasis added) (footnote omitted). *Trump v. Wisconsin Elections Com'n*, 983 F.3d 919 (7th Cir. 2020)

Crumpled Letter Sureśa Ha Jośī 1998
Pain, Fear, Pleasure, Togetherness, Anger, Resignation... A Description Of The Myriad Emotions That Define One Word...Love. A Collage Of Events, Both Past And Present, Is Woven Together With Philosophical Reflections On Life And Art. Why Does The Narrator Choose To Write His Story? Is Writing A Form Of Self-Flagellation, A Way Of Arriving At The Truth, Or A Compulsion? The Central Theme Of 'Crumpled Letter' Is Freedom, One That The Word And The World Are Seeking From Each Other,

But Which Will Always Elude Human Experience. The Novel Brings To Light The Difficult Area Of Interaction Between Language And Reality. Joshi Carries Out The Experiment With A Courage That Borders On Stylistic Brinkmanship. The Effect Is A Poetic Prose That Has No Parallel In The History Of The Gujarati Language.

The Oppressive Present Sudhir Chandra

1992 Study of Hindi, Bengali, Gujarati, and Marathi literature. **Election Law** Landmark Publications 2021-09-22 THIS CASEBOOK contains a selection of U. S. Court of Appeals decisions that analyze and discuss issues stemming from election law. Volume 1 of the casebook covers the District of Columbia Circuit and the First through the Fifth Circuit Court of Appeals. Any restrictions on access to the ballot necessarily "implicate substantial voting, associational[,] and expressive rights protected by the First and Fourteenth Amendments." *McLaughlin v. N.C. Bd. of Elections*, 65 F.3d 1215, 1221 (4th Cir. 1995). However, states have the power to regulate the time, place, and manner of their own elections, see U.S. Const. art. 1, § 4, cl. 1, to ensure that "some sort

of order, rather than chaos, ... accompan[ies] the democratic processes," *Burdick*, 504 U.S. at 433, 112 S.Ct. 2059 (quoting *Storer v. Brown*, 415 U.S. 724, 730, 94 S.Ct. 1274, 39 L.Ed.2d 714 (1974)). Accordingly, in evaluating a challenge to a ballot-access law, courts must weigh the character and magnitude of the asserted injury to the rights protected by the First and Fourteenth Amendments that the plaintiff seeks to vindicate against the precise interests put forward by the State as justifications for the burden imposed by its rule, taking into consideration the extent to which those interests make it necessary to burden the plaintiff's rights. *Id.* at 434, 112 S.Ct. 2059 (citation omitted). When election laws "impose a severe burden on

ballot access," those laws "are subject to strict scrutiny," and will be upheld only if the laws are "narrowly drawn" to support a compelling state interest. *Pisano v. Strach*, 743 F.3d 927, 933 (4th Cir. 2014) (citation omitted). Election laws that impose only a "modest" burden will be upheld if the state can "articulate" its "important regulatory interests." *Libertarian Party of Va. v. Alcorn*, 826 F.3d 708, 716, 719 (4th Cir. 2016) (citations omitted). A "state's important regulatory interests are generally sufficient to justify reasonable, nondiscriminatory restrictions." *Anderson v. Celebrezze*, 460 U.S. 780, 788, 103 S.Ct. 1564, 75 L.Ed.2d 547 (1983). *Buscemi v. Bell*, 964 F. 3d 252 (4th Cir. 2020)

Long Walk To Freedom Nelson Mandela

2013-04-25 These memoirs from one of the great leaders of our time are 'essential reading for anyone who wants to understand history - and then go out and change it' Barack Obama The riveting memoirs of the outstanding moral and political leader of our time, Long Walk to Freedom brilliantly re-creates the drama of the experiences that helped shape Nelson Mandela's destiny. Emotive, compelling and uplifting, Long Walk to Freedom is the exhilarating story of an epic life; a story of hardship, resilience and ultimate triumph told with the clarity and eloquence of a born leader. 'Enthralling . . . Mandela emulates the few great political leaders such as Lincoln and Gandhi, who go beyond mere consensus and move out ahead of their followers to break

new ground' Sunday Times 'The authentic voice of Mandela shines through this book . . . humane, dignified and magnificently unembittered' The Times 'Burns with the luminosity of faith in the invincible nature of human hope and dignity . . . Unforgettable' Andre Brink

Econometric Analysis of Cross Section and Panel Data, second edition

Jeffrey M. Wooldridge 2010-10-01 The second edition of a comprehensive

state-of-the-art graduate level text on microeconomic methods, substantially revised and updated. The second edition of this acclaimed graduate text provides a unified treatment of two methods used in contemporary econometric research, cross section and data panel methods. By focusing on assumptions that can be given behavioral content, the book maintains an appropriate level of rigor while emphasizing intuitive thinking. The analysis covers both linear and nonlinear models, including models with dynamics and/or individual heterogeneity. In addition to general estimation frameworks (particular methods of moments and maximum likelihood), specific linear and nonlinear methods are covered in detail, including probit and logit models and their multivariate, Tobit

models, models for count data, censored and missing data schemes, causal (or treatment) effects, and duration analysis. Econometric Analysis of Cross Section and Panel Data was the first graduate econometrics text to focus on microeconomic data structures, allowing assumptions to be separated into population and sampling assumptions. This second edition has been substantially updated and revised. Improvements include a broader class of models for missing data problems; more detailed treatment of cluster problems, an important topic for empirical researchers; expanded discussion of "generalized instrumental variables" (GIV) estimation; new coverage (based on the author's own recent research) of inverse probability weighting; a

more complete framework for estimating treatment effects with panel data, and a firmly established link between econometric approaches to nonlinear panel data and the "generalized estimating equation" literature popular in statistics and other fields. New attention is given to explaining when particular econometric methods can be applied; the goal is not only to tell readers what does work, but why certain "obvious" procedures do not. The numerous included exercises, both theoretical and computer-based, allow the reader to extend methods covered in the text and discover new insights.

What Works in Girls' Education Gene B Sperling 2015-09-29 Hard-headed evidence on why the returns from investing in girls are so high that

no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the

incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

Digital Electronics Anil K. Maini
2007-09-27 The fundamentals and implementation of digital electronics are essential to understanding the design and working of consumer/industrial electronics, communications, embedded systems, computers, security and military equipment. Devices used in applications such as these are

constantly decreasing in size and employing more complex technology. It is therefore essential for engineers and students to understand the fundamentals, implementation and application principles of digital electronics, devices and integrated circuits. This is so that they can use the most appropriate and effective technique to suit their technical need. This book provides practical and comprehensive coverage of digital electronics, bringing together information on fundamental theory, operational aspects and potential applications. With worked problems, examples, and review questions for each chapter, Digital Electronics includes: information on number systems, binary codes, digital arithmetic, logic gates and families, and Boolean algebra; an in-depth look

at multiplexers, de-multiplexers, devices for arithmetic operations, flip-flops and related devices, counters and registers, and data conversion circuits; up-to-date coverage of recent application fields, such as programmable logic devices, microprocessors, microcontrollers, digital troubleshooting and digital instrumentation. A comprehensive, must-read book on digital electronics for senior undergraduate and graduate students of electrical, electronics and computer engineering, and a valuable reference book for professionals and researchers.

Translating India Rita Kothari 2003

The cultural universe of urban, English-speaking middle class in India shows signs of growing inclusiveness as far as English is concerned. This phenomenon manifests itself in increasing forms of bilingualism (combination of English and one Indian language) in everyday forms of speech - advertisement

jingles, bilingual movies, signboards, and of course conversations. It is also evident in the startling prominence of Indian Writing in English and somewhat less visibly, but steadily rising, activity of English translation from Indian languages. Since the eighties this has led to a frenetic activity around English translation in India's academic and literary circles. Kothari makes this very current phenomenon her chief concern in *Translating India*. The study covers aspects such as the production, reception and marketability of English translation. Through an unusually multi-disciplinary approach, this study situates English translation in India amidst local and global debates on translation, representation and authenticity. The

case of Gujarati - a case study of a relatively marginalized language - is a unique addition that demonstrates the micro-issues involved in translation and the politics of language. Rita Kothari teaches English at St. Xavier's College, Ahmedabad (Gujarat), where she runs a translation research centre on behalf of Katha. She has published widely on literary sociology, postcolonialism and translation issues. Kothari is one of the leading translators from Gujarat. Her first book (a collaboration with Suguna Ramanathan) was an English translation of Gujarati poetry (Modern Gujarati Poetry: A Selection, Sahitya Akademi, New Delhi, 1998). Her English translation of the path-breaking Gujarati Dalit novel Angaliyat is in press (The Stepchild, Oxford

University Press). She is currently working on an English translation of Gujarati short stories by women of Gujarat, a study of the nineteenth-century narratives of Gujarat, and is also engaged in a project on the Sindhi identity in India.

Statistical Methods for Psychology

David C. Howell 2012-01-01

STATISTICAL METHODS FOR PSYCHOLOGY surveys the statistical techniques commonly used in the behavioral and social sciences, particularly psychology and education. To help students gain a better understanding of the specific statistical hypothesis tests that are covered throughout the text, author David Howell emphasizes conceptual understanding. This Eighth Edition continues to focus students on two key themes that are the cornerstones

of this book's success: the importance of looking at the data before beginning a hypothesis test, and the importance of knowing the relationship between the statistical test in use and the theoretical questions being asked by the experiment. New and expanded topics--reflecting the evolving realm of statistical methods--include effect size, meta-analysis, and treatment of missing data. Contemporary Zoroastrians: An Unstructured Nation? Maps throughout. **Gandhi: 'Hind Swaraj' and Other Writings** Mahatma Gandhi 1997-01-28 Hind Swaraj is Mahatma Gandhi's fundamental work. It is a key to understanding not only his life and thought but also the politics of South Asia in the first half of the twentieth century. For the first time this volume presents the 1910 text of Hind Swaraj and includes Gandhi's own Preface and Foreword (not found in other editions) and annotations by the editor. In his Introduction, Anthony Parel sets the work in its historical and political contexts. He analyses the significance of Gandhi's experiences in England and South Africa, and examines the intellectual cross-currents from East and West that affected the formation of the

mind and character of one of the twentieth century's truly outstanding figures. The second part of the volume contains some of Gandhi's other writings, including his correspondence with Tolstoy, Nehru and others. Short bibliographical synopses of prominent figures mentioned in the text and a chronology of important events are also included as aids to the reader.

The Conduct of Parliamentary Elections Lung-chi Lo 1925

Living Zoroastrianism Philip G. Kreyenbroek 2001 This text describes the realities of modern Parsi religion through 30 interviews in which urban Parsis belonging to different social milieus and religious schools of thought discuss various aspects of their religious lives. Zoroastrianism, the faith founded by the Iranian prophet Zarathustra, originated around 1000BCE and is widely regarded as the world's first revealed religion. Although the number of its followers declined dramatically in the

centuries after the 7th century Islamic conquest of Iran, Zoroastrians survive in Iran to the present day. The other major Zoroastrian community are the Parsis of India, descendants of Zoroastrians who fled Muslim dominion.
