The Click Moment Frans Johansson 2012 Success is random. And there are a number of things that we can do to capture this randomness and focus it in our favour. According to bestselling author Frans Johansson strategy, planning, and careful analysis no longer guarantee strong performances. But dig deep into the actions of successful people and organizations and you'll find one common theme. A turning point occurs - a major client signs on, a new competitor redefines the market, an unlikely idea surfaces - and they take advantage of that 'click moment' to change their fate. Diane von Furstenberg saw a matching skirt and top on TV and the wrap-dress was born. Microsoft Windows was on the brink of being shut down until two people met unexpectedly at a party. Starbucks sold brewing equipment and coffee by the pound until Howard Schultz experienced his first latte. Each of these individuals experienced a rare point of opportunity that was completely unexpected. But they capitalized on their luck in ways that paid off, and altered the course of their lives. Johansson shows the actions we can take to create click moments, open ourselves up to chance encounters, and harness the forces of success that follow. 'With characteristic clarity, Johansson presents an account of how randomness, serendipity and 'luck' can be used to enhance success in business and your own life.' The Lost Art of Steam Heating Dan Holohan 1992 This was my first book and a true labor of love. I spent decades studying steam and the work of Dead Men, in both old buildings and on library shelves. I traveled the country, haunting used-book stores, looking for engineering books that held the answers to questions that nagged at me. I was obsessed with this topic, and when I finally sat to write, I poured all that I had learned into this book, and as I wrote, I tried my best to make the words sound good to you - like we were together and having a conversation. I wanted you to know what I know and I wanted you to be able to do what I can do when it comes to old steam systems. This book arrived in 1992 and has since gone through dozens of printings. We've sold it in every state as well as in foreign countries. Steam heat is everywhere there are old buildings, so why shouldn't you be the one with the answers? Dan Holohan

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.
