Deanna D. Sellnow 2003 Class-tested by over forty instructors for the past three years, Deanna Sellnow’s exciting new textbook provides a contemporary and comprehensive alternative approach to the public speaking process. Reflecting the latest in communication research yet fully focused on the needs of today’s students, ‘Public Speaking’ showcases both innovative and time-tested strategies to help readers learn and apply the skills necessary to become effective public speakers. Unique coverage of “learning styles” as they apply both to the speaker and audience is highlighted and integrated throughout the text. Students are taught how to assess their own learning styles and how to apply their knowledge of different learning styles both to their analysis of audiences and in the presentation of their speeches.

Fallacies and Judgments of Reasonableness Frans H. van Eemeren 2009-08-05 In Fallacies and Judgments of Reasonableness, Frans H. van Eemeren, Bart Garssen and Bert Meuffels report on their systematic empirical research of the conventional validity of the pragma-dialectical discussion rules. The experimental studies they carried out during more than ten years start from the pragma-dialectical theory of argumentation developed at the University of Amsterdam, their home university. In these studies they test methodically the intersubjective acceptability of the rules for critical discussion proposed in this theory by confronting ordinary arguers who have not received any special education in argumentation and fallacies with discussion fragments containing both fallacious and non-fallacious argumentative moves. The research covers a wide range of informal fallacies. In this way, the authors create a basis for comparing the theoretical reasonableness conception of pragma-dialectics with the norms for judging argumentative moves prevailing in argumentative practice. Fallacies and Judgments of Reasonableness provides a unique insight into the relationship between theoretical and practical conceptions of reasonableness, supported by extensive empirical material gained by means of sophisticated experimental research.

The English Department Walter Ross Winterowd 1998 To understand the history of “English,” Ross Winterowd insists, one must understand how literary studies, composition-rhetoric studies, and influential textbooks interrelate. Stressing the interrelationship among these three forces, Winterowd presents a history of English studies in the university since the Enlightenment. Winterowd’s history is unique in three ways. First, it tells the whole story of English studies: it does not separate the history of literary studies from that of composition-rhetoric studies, nor can it if it is going to be an authentic history. Second, it traces the massive influence on English studies exerted by textbooks such as *Adventures in Literature*, *Understanding Poetry*, *English in Action*, and the *Harbrace College Handbook*. Finally, Winterowd himself is very much a part of the story, a partisan with more than forty years of service to the discipline, not simply a disinterested scholar searching for the truth. After demonstrating that literary studies and literary scholars are products of Romantic epistemology and values, Winterowd further invites controversy by reinterpreting the Romantic legacy inherited by English departments. His reinterpretation of major literary figures and theory, too, invites discussion, possibly argument. And by directly contradicting current histories of composition-rhetoric that allow for no points of contact with literature, Winterowd intensifies the argument by explaining the development of composition-rhetoric from the standpoint of literature and literary theory. **Classical Rhetoric and Its Christian and Secular Tradition from Ancient to Modern Times** George A. Kennedy 2003-07-11 Since its original publication by UNC Press in 1980, this book has provided thousands of students with a concise introduction and guide to the history of the classical tradition in rhetoric, the ancient but ever vital art of persuasion. Now, George Kennedy offers a thoroughly revised and updated edition of *Classical Rhetoric and Its Christian and Secular Tradition*. From its development in ancient Greece and Rome, through its continuation and adaptation in Europe and America through the Middle Ages and Renaissance, to its enduring significance in the twentieth century, he traces the theory and practice of classical rhetoric through history. At each stage of the way, he demonstrates how new societies modified classical rhetoric to fit their needs. For this edition, Kennedy has updated the text and the bibliography to incorporate new scholarship; added sections relating to women orators and rhetoricians throughout history; and enlarged the discussion of rhetoric in America, Germany, and Spain. He has also included more information about historical and intellectual contexts to assist the reader in understanding the tradition of classical rhetoric.

Political Literacy in Composition and Rhetoric Donald Lazere 2015-07-20 During the 1970s, the National Council for Teachers of English issued a series of resolutions calling for the teaching of “critical reading, listening, viewing, and thinking skills necessary to enable students to cope with the sophisticated persuasion techniques in political statements, advertising, entertainment, and news.” However, in recent decades, under the sway of multiculturalism and postmodern theory, comosition and rhetoric pedagogies have strayed from these goals. In *Political Literacy in Composition and Rhetoric*, author and teacher Donald Lazere issues a call to action for the return to an emphasis on critical thinking skills and multidisciplinary approaches in the teaching of composition and rhetoric. Lazere also presents a keen sociocultural observation regarding the majority of the “Middle Americans” demographic—lower-middle class, rural, white students with a conservative leaning and an occasional resistance to change—and their learning behaviors and needs. Finally, Lazere offers a roadmap for a new kind of curriculum, one that he argues will enable teachers of composition and rhetoric to foster a sense of civic literacy in their students and thus, by extension, American society as a whole.

The very name “*Metalogicon*”, a coinage by the author, brings together the Greek *meta* (on behalf of) and *logicon* (logic or logical studies). Thus, in naming his text, he also explained it. With this lucid treatise on education, John of Salisbury urges a thorough grounding in the arts of words (oral and written) and reasoning, as these topics are addressed in grammar and logic. Written more than nine hundred years ago, *The Metalogicon* still possesses an invigorating originality that invites readers to refresh themselves at the sources of Western learning.

Perspectives on Rhetorical Invention Janet Atwill 2002 Rhetorical invention--the discursive art of inquiry and discovery--has great significance in the history of spoken and written communication, dating back to the ancient Greeks and Romans. Yet invention has received relatively little attention in recent discussions of rhetoric, writing, and communication. This collection of essays is the first book in years to focus on current research in rhetorical invention. The contributors include many well-established scholars, as well as new voices in the field. They reflect a variety of approaches and perspectives: theory, history, culture, politics, institutions, pedagogy, and community service. Several of the essays address the relationship between invention and postmodernism--some by refiguring invention, others by challenging postmodernism. Still other essays explore multicultural conceptions of invention, the civic function of invention and rhetoric, and the role of rhetorical invention in institutions and in community problem solving. Taken together, these essays provide a much-needed forum for ongoing study of rhetorical invention within the framework of recent developments in both scholarship and the culture at large. "If inventional research is to continue and flourish," notes Janice Lauer in her foreword, "it must remain sensitive to shifts in epistemology, ethics, and politics. The essays in this volume undertake this effort.." The Editors: Janet M. Atwill is associate professor of English at the University of Tennessee. Logic and Philosophy Howard Kahane 2020-12-18 A comprehensive introduction to formal logic, Logic and Philosophy: A Modern Introduction is a rigorous yet accessible text, appropriate for students encountering the subject for the first time. Abundant, carefully crafted exercise sets accompanied by a clear, engaging exposition build to an exploration of sentential logic, first-order predicate logic, the theory of descriptions, identity, relations, set theory, modal logic, and Aristotelian logic. And as its title suggests, Logic and Philosophy is devoted not only to logic but also to the philosophical debates that led to the development of the field. Much new material has been added for the 13th edition. An introduction to set theory and its relationship to logic and mathematics, including philosophical issues, is now part of Chapter 13. Chapter 15 is an introduction to modal logic and Kripke semantics, concluding with a discussion of philosophical problems with any logical accommodation of modalities. Instructors who do not wish to present proof methods will find chapters on truth trees for both sentential and first-order logic, and a presentation of trees for modal logic. Special features of this text include presentations of the history of logic, alternatives to traditional methods of conditional and indirect proof, and a discussion of semantic problems with universal and existential instantiations. Throughout, the authors are sensitive to philosophical issues that arise from the relationship between ordinary language, symbolic logic, and justifications for the syntax and semantics of the various symbolic languages. Discussions range from the justification of the truth table for the sentential rendering of if . . . then statements to semantic and syntactic paradoxes, including some troubling paradoxes that arise in ordinary language (e.g., the so-called hangman or surprise quiz paradox). Logic and Philosophy includes ample material for a one-semester or two-semester course and provides a thorough preparation for more advanced logic courses.

Introduction to Logic and Critical Thinking Merrilee H. Salmon 1989

A Theory of Contemporary Rhetoric Richard Andrews 2013-08-22 A Theory of Contemporary Rhetoric describes, explains, and argues the overarching theory of contemporary rhetoric. This current view of rhetoric brings together themes in the communication arts, including political literary criticism; bi- and multi-lingualism; multimodality; framing as an artistic and sociological device for composition and interpretation; literacy in the digital age; and the division between fiction and ‘non-fiction’ in language/literature studies. Chapters explore the implications of rhetoric for particular aspects of the field. Discussions throughout the book provide illustrations that ground the material in practice. As an overarching theory in the communication arts, rhetoric is elegant as a theoretical solution and simple as a practical one. It asks such questions as who is speaking/writing/composing? to whom? why? what is being conveyed? and how is it being conveyed? Acknowledging the dirt of recent works addressing the theory of rhetoric, this book aims to fill the existing theoretical gap and at the same time move the field of language/literature studies forward into new territory. It provides the keynote theoretical guide for a generation of teachers, teacher educators and researchers in the fields of English as a subject; English as a second, foreign or additional language; and language study in general.

This unique text encourages students to step back and sharpen their analytic focus with 25 essays that use social research to expose the gray areas of commonly held beliefs, revealing the complexity of social reality and sharpening students’ sociological vision.
