But REA doesn't stop there: we give you thorough yet concise topical reviews, a series of targeted drills, and an up-to-date glossary that comprises the full range of terminology with which you should be familiar. If you are taking the United States Government and Politics exam, you'll want to concentrate on the first part of this book. The second part of the book is devoted to the Comparative Government and Politics exam. In both cases,

you'll find a lively course review keyed to exactly the material you'll need to know to score well on the test, complemented by our handy glossary to help you get the most out of your study time. Two complete practice exams are provided for U.S. Government and Politics, while one full-length practice exam is provided for Comparative Government and Politics. Each REA practice exam features an answer key and detailed explanations for every question. The explanations not only provide the correct response but also tell you why the remaining answers shouldn't be chosen. By going over the appropriate review section(s), taking the corresponding exam(s), and studying our detailed explanations, you will discover your strengths and weaknesses and prepare yourself to score well on the AP Government and Politics exams. About the Advanced Placement Program The Advanced Placement Program is designed to provide high school students with the

opportunity to pursue college-level studies while still attending high school. The program consists of two components: an AP course and an AP exam. In addition, the AP in Government and Politics curriculum is divided into two courses: United States Government & Politics and Comparative Government & Politics. If you wish to pursue an Advanced Placement in Government and Politics course you may enroll in the United States course, the Comparative course, or both. You will be expected to leave the course(s) with college-level writing skills and knowledge of government and politics. Upon completion of the course(s), you may then take the corresponding AP exam(s). Test results are then used to grant course credit and/or determine placement level in the subject when you enter college. AP exams are administered every May. The exam schedule has been designed to allow you the opportunity to take both exams, if you are enrolled in

both courses. If the United States exam is given during the morning administration, the Comparative exam will be given during the afternoon administration. The AP United States Government & Politics Exam The United States exam is 145 minutes in length and is divided into two sections: I. Multiple-Choice (50% of your grade): This 45-minute section is composed of 60 questions designed to measure your understanding of facts, concepts, and theories pertinent to United States government and politics. Your ability to analyze and understand data, and the patterns and consequences involved with political processes and behaviors will also be tested. In addition you must have knowledge of the various institutions, groups, beliefs, and ideas relevant to United States government and politics. II. Free-Response (50% of your grade): This 100-minute section consists of four mandatory questions, each of which accounts for one-fourth of your total free-response

score. You should allot roughly 25 minutes - or one-quarter of the total time in the free-response segment - for each essay. Each question normally asks you to interrelate ideas from different content areas from among the topics listed below. In addition, you may also be asked to evaluate and define fundamental concepts in the study of United States politics, and possibly to analyze case studies that bear on political relationships and events in the United States. You will be required to demonstrate mastery of political interpretation, and analytic and organizational skills through writing. In addition, you may be presented with graphs, charts and tables from whose data you would be asked to draw logical conclusions. Here's a breakdown of coverage on the United States exam: Topics / % of Exam I. Constitutional Underpinnings of United States Government / 5-15% II. Political Beliefs and Behaviors / 10-20% III. Political Parties, Interest Groups, and Mass

Media / 10-20% IV. Institutions of National Government: The Congress, the Presidency, the Bureaucracy, and the Federal Courts / 35-45% V. Public Policy / 5-15% VI. Civil Rights and Civil Liberties / 5-15% The AP Comparative Government & Politics Exam The Comparative exam is 145 minutes long and is divided into two sections: I. Multiple-Choice (50% of your grade): This 45-minute section is composed of 60 questions designed to measure your understanding of facts, concepts, and theories pertinent to Comparative government and politics. Your ability to analyze and understand data, and the patterns and consequences involved with political processes and behaviors will also be tested. The countries normally tested in the multiple-choice questions include Great Britain, France, the former Soviet Union (Commonwealth of Independent States), and China; these are referred to as the core countries tested on the exam. For certain questions, basic knowledge of

the United States will be assumed. II. Free-Response (50% of your grade): This 100-minute section consists of four mandatory questions, each of which accounts for one-fourth of your total free-response score. You should allot roughly 25 minutes - or one-quarter of the total time in the free-response segment - for each essay. Comparative Free-Response questions may require you to compare one or two of the core countries (Great Britain, France, China, and the former Soviet Union) with the developing nations of either India, Mexico, or Nigeria. To do this, you must be able to demonstrate knowledge of the politics of one of these developing nations. Here's a breakdown of coverage on the Comparative exam: Topics / % of Exam I. The Sources of Public Authority and Political Power / 5-15% II. Society and Politics / 5-15% III. The Relationship Between Citizen and State / 5-15% IV. Political and Institutional Frameworks / 35-45% V. Political Change / 15-25% VI.

The Comparative Method / 5-10% About the Review Sections As mentioned earlier, this book includes two reviews: one for United States Government and Politics, the other for Comparative Government and Politics. The United States Government and Politics Review covers all of the key information you'll need to score well on the United States exam. These topics include: - Constitutional Framework - The Federal Government - Political Institutions and Special Interests - Public Opinion and Voter Behavior - Civil Rights and the Supreme Court We also provide a glossary for the United States Government and Politics exam. Included are the key historical figures, court cases, programs, laws, etc., that often appear on this AP exam. The Comparative Review provides a thorough discussion of the material most often tested on the Comparative exam. Special emphasis is placed on the governments and politics of: - Britain - France - The former Soviet Union - The People's

Republic of China A glossary for the Comparative Government and Politics exam enables you to brush up on terms that you are likely to encounter on this test. Scoring the Exam After the AP administrations, more than 1,700 college professors and secondary school teachers are brought together to grade the exams during the first two weeks of June. These readers are chosen from around the United States for their familiarity with the AP program. The Multiple-Choice sections of the Comparative Government & Politics and U.S. Government & Politics exams are scored by granting one point for each correct answer and deducting one-fourth of a point for each incorrect answer. Unanswered questions receive neither credit nor deduction. The Free-Response answers are read and scored using a specific set of objective criteria, but the actual points available for each question may vary from administration to administration. For purposes of this discussion - and REA's

practice tests - the Comparative exam questions will yield a score between 0 and 9 (with 0 being the lowest and 9 the highest) on Free-Response Part I, and a score of between 0 and 5 (with 0 being the lowest and 5 the highest) on Free-Response Part II. All four Free-Response items on our U.S. Government practice exam are scored on the 0-to-9 scale. Once the responses are graded, the scores can be converted. The AP Government and Politics exam is based on a 120-point scale. The breakdown of the percentages and points is as follows (note that the available free-response points will vary): Once raw scores have been obtained for each section, they are weighted to produce a composite score. Then the composite scores for each section are added together to form a total composite score for the exam. The range for the composite score is from 0 to 120. Finally, the composite score is translated into a range of from 1 to 5, with 1 being the lowest and 5 the highest. Scoring the

Multiple-Choice Section Use this formula to calculate your raw score for the multiple-choice section: $(\# \text{ right answers}) - (\# \text{ wrong} \times 1/4) = \text{raw score}$ "round off to nearest whole number; if the number is less than zero, enter zero"

Scoring the Free-Response Section The following guide explains typical free-response scoring criteria: Score Explanation of Score 8-9 The thesis is extremely well developed and is supported with concrete evidence; all aspects of the question have been addressed thoroughly; discussions presented are balanced. 6-7 The thesis is defined and supported; the evidence provided is very organized; the essay may be slightly imbalanced with one strong argument and one weak argument and/or discuss one topic more thoroughly than the next; sporadic factual errors may appear. 5 A basic argument or thesis is provided; evidence given supports the argument or thesis, but does not clearly connect with the argument or thesis; only the

formal facets of the question are dealt with, and informal facets are not adequately covered; not all aspects of the question are discussed. 4 The thesis is not organized and is not referred to in the essay; the essay is little more than a recounting of facts and events; the essay may be overloaded with data; only one facet of the questions may be discussed; numerous factual errors may appear. 3 The thesis is weak; evidence provided in support does not apply to the thesis; factual errors are apparent. 2 The thesis is very weak; little or no factual evidence is provided to support the thesis; irrelevant and inaccurate information appears. 1 An attempt is made to answer the question, but the support given is insignificant and the coverage of topics is incomplete. 0 The question is not answered with any significance. Free-Response Part II (Comparative only) Score Explanation of Score 5 The thesis is extremely well developed and is supported with concrete evidence; all

aspects of the question have been addressed thoroughly; discussions are presented in a balanced way. 4 The thesis is defined and supported; the evidence provided is very organized; the essay may be slightly imbalanced, with one strong argument and one weak argument; likewise, one topic may be more thoroughly explored than another; may be marred by sporadic factual errors. 3 A basic argument or thesis is presented; evidence given supports the argument or thesis, but does not clearly connect with the argument or thesis; only the formal facets of the question are dealt with, and informal facets are not adequately covered; not all aspects of the question are discussed. 2 The thesis is weak; evidence provided in support does not apply to the thesis; factual errors are apparent. 1 An attempt is made to answer the question, but the support given is insignificant and the coverage of topics is incomplete. 0 The question is not answered with any significance. It would be

extremely helpful to find someone who is willing to score your essay - your teachers or anyone who is familiar with the test material. If you do, ask the person to assign each of your U.S. and Comparative (Part I) essays a score of 0 to 9. For your Comparative (Part II) essays, use the 0-to-5 scale. If you must grade your own essays, try to be objective! In addition, you may want to give your essays three different grades. For instance, if you feel you did well, try giving the essay a score of 5, 6, or 7 to represent the various scores you may receive. By underestimating what your score may be, you are more likely to receive a better score on the actual exam. Use the following formulae to determine your raw score for the Free-Response section: United States Exam (Free-Response) Response (1) score x 1.66 = raw score Response (2) score x 1.66 = raw score Response (3) score x 1.66 = raw score Response (4) score x 1.66 = raw score Comparative Exam

Response (1) score x 1.66 = raw score
Response (2) score x 1.66 = raw score
Response (3) score x 3 = raw score
Response (4) score x 3 = raw score
The Composite Score
Once you have obtained your raw scores for both the Multiple-Choice and the Free-Response sections, add the scores together to get your composite score:
United States Exam Multiple-Choice raw score + Free-Response raw score = composite score (round to nearest whole number)
Score Essay 1 + Score Essay 2 + Score Essay 3 + Score Essay 4 = raw score
Comparative Exam Multiple-Choice raw score + Free-Response raw score = composite score (round to nearest whole number)
Now compare your composite score with the scale below:
Composite Score / AP Grade
88 - 120 / 5
74 - 87 / 4
54 - 73 / 3
35 - 53 / 2
0 - 34 / 1
AP grades are interpreted as follows: 5-extremely well qualified, 4-well qualified, 3-qualified, 2-possibly qualified, and 1-no recommendation. Scores that Earn College Credit and/or

Advanced Placement Most colleges grant students who earn a 3 or above college credit and/or advanced placement. You should check with your school guidance office about specific college requirements.
Studying for Your AP Examination It is never too early to start studying. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn the test material. It is very important for you to choose the time and place for studying that works best for you. Some students may set aside a certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day, while waiting on a line, or even while eating lunch. Only you can determine when and where your study time will be most effective. But, be consistent and use your time wisely. Work out a study routine and stick to

it! When you take the practice exam(s), try to make your testing conditions as much like the actual test as possible. Turn your television and radio off, and sit down at a quiet table free from distraction. Make sure to time yourself. As you complete the practice test(s), score your test(s) and thoroughly review the explanations to the questions you answered incorrectly, but do not review too much during any one sitting. Concentrate on one problem area at a time by reviewing the question and explanation, and by studying our review(s) until you are confident that you completely understand the material. Since you will be allowed to write in your test booklet during the actual exam, you may want to write in the margins and spaces of this book when practicing. However, do not make miscellaneous notes on your answer sheet. Mark your answers clearly and make sure the answer you have chosen corresponds to the question you are answering. Keep track of your scores! By doing so,

you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the reviews that cover the topics causing you difficulty, as this will build your skills in those areas. To get the most out of your studying time, we recommend that you follow the Study Schedule which corresponds to the exam you are taking. It details how you can best budget your time. If you are taking both exams, do not try to study for each at the same time. Try alternating days by studying for the United States exam one day and the Comparative exam the next.

Test-Taking Tips Although you may be unfamiliar with tests such as the Advanced Placement exams, there are many ways to acquaint yourself with this type of examination and help alleviate your test-taking anxieties. Listed below are ways to help yourself become accustomed to the AP exam, some of which may also be applied to other standardized tests. Become comfortable with the format of

the AP Examination in Government and Politics that you are taking. When you are practicing to take the exam(s), simulate the conditions under which you will be taking the actual test(s). You should practice under the same time constraints as well. Stay calm and pace yourself. After simulating the test only a couple of times, you will boost your chances of doing well, and you will be able to sit down for the actual test much more confidently. Know the directions and format for each section of the exam.

Familiarizing yourself with the directions and format of the different test sections will not only save you time, but will also ensure that you are familiar enough with the AP exam to avoid nervousness (and the mistakes caused by being nervous). Work on the easier questions first. If you find yourself working too long on one question, make a mark next to it in your test booklet and continue. After you have answered all of the questions that you can, go back to the

ones you have skipped. Use the process of elimination when you are unsure of an answer. If you can eliminate three of the answer choices, you have given yourself a fifty-fifty chance of getting the item correct since there will only be two choices left from which to make a guess. If you cannot eliminate at least three of the answer choices, you may choose not to guess, as you will be penalized one-quarter of a point for every incorrect answer. Questions not answered will not be counted. Be sure that you are marking your answer in the circle that corresponds to the number of the question in the test booklet. Since the multiple-choice section is graded by machine, marking the wrong answer will throw off your score.

Teachers, too, will find this book an excellent resource for the Advanced Placement course in U.S. History. In fact, many AP instructors use it as a supplementary text because it so comprehensively supports and addresses specific curriculum objectives for the course and exam. ABOUT THE TEST The Advanced Placement Program is designed to allow high school students to pursue college-level studies while attending high school. The three-hour five-minute AP U.S.

History exam is usually given to high school students who have completed a year's study in a college-level U.S. History course. The test results are then used to determine the awarding of course credit and/or advanced course placement in college. According to the College Board, students taking this exam are called upon to demonstrate "systematic factual knowledge" and bring to bear critical, persuasive analysis of the full sweep of U.S. history. This is why we make every effort to establish and build upon context for you, rather than encouraging rote memorization of disconnected facts. The AP U.S. History Exam is divided into two sections: 1) Multiple-Choice: This section is composed of 80 multiple-choice questions designed to gauge your ability to understand and analyze U.S. history from the Colonial period to the present. The majority of the questions, however, are based on 19th- and 20th-century history. This section tests factual

knowledge, scope of preparation, and knowledge-based analytical skills. You'll have 55 minutes to complete this section, which accounts for 50 percent of your final grade. 2) Free-Response: This section is composed of three essay questions designed to measure your ability to write coherent, intelligent, well-organized essays on historical topics. The essays require you to demonstrate mastery of historical interpretation and the ability to express views and knowledge in writing. The essays may relate documents to different areas, analyze common themes of different time periods, or compare individual and group experiences which reflect socioeconomic, racial, gender, and ethnic differences. Part A consists of a mandatory 15-minute reading period, followed by 45 minutes during which you must answer a document-based question (DBQ), which changes from year to year. In Part B the student chooses to answer on two of the topics that are

given. You will have 70 minutes to write these essays. The free-response section counts for 50 percent of your final grade.

These topics are broken down into thirds: - Political Institutions (1/3rd) - Social and Economic Change (1/3rd) - Behavior and Public Policy, Diplomacy and International Relations, Intellectual and Cultural Development (1/3rd) The time periods covered are as follows: - Pre-Colonial through 1789 (1/6th of exam) - 1790-1914 (1/2 of exam) - 1915-present (1/3rd of exam)

ABOUT THE REVIEW

SECTION This book begins with REA's concise yet thorough 230-page review of U.S. history designed to acquaint you with the exam's scope of coverage. Our review covers these topics and historical time periods: - The Colonial Period (1500-1763) - The American Revolution (1763-1787) - The United States Constitution (1787-1789) - The New National (1789-1824) - Jacksonian Democracy and Westward Expansion

(1824-1850) - Sectional Conflict and The Causes of the Civil War (1850-1860) - The Civil War and Reconstruction (1860-1877) - Industrialism, War, and the Progressive Era (1877-1912) - Wilson and World War I (1912-1920) - The Roaring Twenties and Economic Collapse (1920-1929) - The Great Depression and the New Deal (1929-1941) - World War II and the Post-War Era (1941-1960) - The New Frontier, Vietnam, and Social Upheaval (1960-1972) - Watergate, Carter, and the New Conservatism (1972-2001)

SCORING THE EXAM The multiple-choice section of the exam is scored by crediting each correct answer with one point and deducting one-fourth of a point for each incorrect answer. You will neither receive a credit nor suffer a deduction for unanswered questions. The free-response essays are graded by instructors and professors from across the country who come together each June for a week of non-stop AP essay grading. Each essay booklet is read and

scored by several graders. Each grader provides a score for the individual essays. The DBQ is scored on a scale from 0 to 15, 0 being the lowest and 15 the highest. Each topic-based essay receives a score from 0 to 9. These scores are concealed so that each grader is unaware of the previous graders' assessments. When the essays have been graded completely, the scores are averaged-one score for each essay-so that the free-response section generates three scores. The total weight of the free-response section is 50 percent of the total score. Your work in the multiple-choice section counts for the other 50 percent. Each year, grades fluctuate slightly because the grading scale is adjusted to take into account the performance of the total AP U.S. History test-taker population. When used with the corresponding chart, the scoring method we present here will strongly approximate the score you would receive if you were sitting for the actual AP U.S. History exam.

SCORING THE MULTIPLE-CHOICE SECTION For the multiple-choice section, use this formula to calculate your raw score: $\text{Number right} - (\text{number wrong} \times 1/4) = \text{raw score}$ (round to the nearest whole number) **SCORING THE FREE-RESPONSE SECTION** For the free-response section, use this formula to calculate your raw score: $\text{DBQ} + \text{Essay \#1} + \text{Essay \#2} = \text{raw score}$ (round to the nearest whole number) You may want to give your essays three different grades, such as a 13, 10, and an 8, and then calculate your score three ways: as if you did *Social Studies Test Preparation Constitution and New Government* Linda Trachtman 2005-01-06 These flexible assessments can be used both in correlation with the Primary Sources kits or as stand-alone practice pieces for a variety of standardized tests. In addition, no calculator requiring an external power source will be allowed, and calculators may not be shared - you must bring your own. STUDYING FOR THE SAT II: MATH LEVEL IIC It is very important to choose the time and place for studying that works best for you. Some students may set aside a certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day, while waiting on line, or even while eating lunch. Only you can determine when and where your study time will be most effective. Be consistent and use your time wisely. Work out a study routine and stick to it! When you take the practice tests, try to make your testing

conditions as much like the actual test as possible. Turn your television and radio off, and sit down at a quiet desk or table free from distraction. Make sure to clock yourself with a timer. As you complete each practice test, score it and thoroughly review the explanations to the questions you answered incorrectly; however, do not review too much at any one time.

Concentrate on one problem area at a time by reviewing the questions and explanations, and by studying our review until you are confident you completely understand the material. Keep track of your scores. By doing so, you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the reviews that cover your areas of difficulty, as this will build your skills in those areas. TEST TAKING TIPS

Although you may be unfamiliar with standardized tests such as the SAT II: Math Level IIC Subject Test, there are many ways to acquaint

yourself with this type of examination and help alleviate your test-taking anxieties.

Become comfortable with the format of the exam. When you are practicing to take the SAT II: Math Level IIC Subject Test, simulate the conditions under which you will be taking the actual test. Stay calm and pace yourself. After simulating the test only a couple of times, you will boost your chances of doing well, and you will be able to sit down for the actual exam with much more confidence.

Know the directions and format for each section of the test. Familiarizing yourself with the directions and format of the exam will not only save you time, but will also ensure that you are familiar enough with the SAT II: Math Level IIC Subject Test to avoid nervousness (and the mistakes caused by being nervous). Do your scratchwork in the margins of the test booklet. You will not be given scrap paper during the exam, and you may not perform scratchwork on your answer sheet. Space is provided in

your test booklet to do any necessary work or draw diagrams. If you are unsure of an answer, guess. However, if you do guess - guess wisely. Use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible. By eliminating three answer choices, you give yourself a 50/50 chance of answering correctly since there will only be two choices left from which to make your guess. Mark your answers in the appropriate spaces on the answer sheet. Each numbered row will contain five ovals corresponding to each answer choice for that question. Fill in the oval that corresponds to your answer darkly, completely, and neatly. You can change your answer, but remember to completely erase your old answer. Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly. When you have finished working on a section, you may want to go back and check to make sure your answers

correspond to the correct questions. Marking one answer in the wrong space will throw off the rest of your test, whether it is graded by machine or by hand. You don't have to answer every question. You are not penalized if you do not answer every question. The only penalty results from answering a question incorrectly. Try to use the guessing strategy, but if you are truly stumped by a question, remember that you do not have to answer it. Work quickly and steadily. You have a limited amount of time to work on each section, so you need to work quickly and steadily. Avoid focusing on one problem for too long. Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test. On the night before the test, gather together the materials you will need the next day: - Your admission ticket - Two forms of identification (e.g., driver's license, student identification card, or current alien

registration card) - Two No. 2 pencils with erasers - Directions to the test center - A watch (if you wish) but not one that makes noise, as it may disturb other test-takers On the day of the test, you should wake up early (after a good night's rest) and have breakfast. Dress comfortably, so that you are not distracted by being too hot or too cold while taking the test. Also, plan to arrive at the test center early. This will allow you to collect your thoughts and relax before the test, and will also spare you the stress of being late. If you arrive after the test begins, you will not be admitted to the test center and you will not receive a refund. During the Test When you arrive at the test center, try to find a seat where you feel most comfortable. Follow all the rules and instructions given by the test supervisor. If you do not, you risk being dismissed from the test and having your scores canceled. Once all the test materials are passed out, the test instructor will give you directions for filling out your

answer sheet. Fill this sheet out carefully since this information will appear on your score report. After the Test When you have completed the SAT II: Math Level IIC Subject Test, you may hand in your test materials and leave. Then, go home and relax! When Will I Receive My Score Report and What Will It Look Like? You should receive your score report about five weeks after you take the test. This report will include your scores, percentile ranks, and interpretive information. **Strengthening Forensic
Science in the United States**

National Research Council
2009-07-29 Scores of talented
and dedicated people serve the
forensic science community,
performing vitally important
work. However, they are often
constrained by lack of
adequate resources, sound
policies, and national support.
It is clear that change and
advancements, both systematic
and scientific, are needed in a
number of forensic science
disciplines to ensure the
reliability of work, establish
enforceable standards, and
promote best practices with
consistent application.
Strengthening Forensic
Science in the United States: A
Path Forward provides a
detailed plan for addressing
these needs and suggests the
creation of a new government
entity, the National Institute of
Forensic Science, to establish
and enforce standards within

the forensic science
community. The benefits of
improving and regulating the
forensic science disciplines are
clear: assisting law
enforcement officials,
enhancing homeland security,
and reducing the risk of
wrongful conviction and
exoneration. Strengthening
Forensic Science in the United
States gives a full account of
what is needed to advance the
forensic science disciplines,
including upgrading of systems
and organizational structures,
better training, widespread
adoption of uniform and
enforceable best practices, and
mandatory certification and
accreditation programs. While
this book provides an essential
call-to-action for congress and
policy makers, it also serves as
a vital tool for law enforcement
agencies, criminal prosecutors
and attorneys, and forensic
science educators.

The Green Book Great
Britain. Treasury 2003 This
new edition incorporates
revised guidance from H.M
Treasury which is designed to
promote efficient policy

development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

Turn your television and radio off, and sit down at a quiet desk or table free from distraction. Make sure to clock yourself with a timer. As you complete each practice test, score it and thoroughly review the explanations to the questions

you answered incorrectly; however, do not review too much at any one time. Concentrate on one problem area at a time by reviewing the questions and explanations, and by studying our review until you are confident you completely understand the material. Keep track of your scores. By doing so, you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the reviews that cover your areas of difficulty, as this will build your skills in those areas.

TEST TAKING TIPS

Although you may be unfamiliar with standardized tests such as the SAT II: Chemistry Subject Test, there are many ways to acquaint yourself with this type of examination and help alleviate your test-taking anxieties. Become comfortable with the format of the exam. When you are practicing to take the SAT II: Chemistry Subject Test, simulate the conditions under which you will be taking the actual test. Stay calm and pace

yourself. After simulating the test only a couple of times, you will boost your chances of doing well, and you will be able to sit down for the actual exam with much more confidence. Know the directions and format for each section of the test. Familiarizing yourself with the directions and format of the exam will not only save you time, but will also ensure that you are familiar enough with the SAT II: Chemistry Subject Test to avoid nervousness (and the mistakes caused by being nervous). Do your scratchwork in the margins of the test booklet. You will not be given scrap paper during the exam, and you may not perform scratchwork on your answer sheet. Space is provided in your test booklet to do any necessary work or draw diagrams. If you are unsure of an answer, guess. However, if you do guess - guess wisely. Use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible. By eliminating three answer choices, you give

yourself a fifty-fifty chance of answering correctly since there will only be two choices left from which to make your guess. Mark your answers in the appropriate spaces on the answer sheet. Fill in the oval that corresponds to your answer darkly, completely, and neatly. You can change your answer, but remember to completely erase your old answer. Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly. When you have finished working on a section, you may want to go back and check to make sure your answers correspond to the correct questions. Marking one answer in the wrong space will throw off the rest of your test, whether it is graded by machine or by hand. You don't have to answer every question. You are not penalized if you do not answer every question. The only penalty results from answering a question incorrectly. Try to use the guessing strategy, but if you are truly stumped by a question, remember that you

do not have to answer it. Work quickly and steadily. You have a limited amount of time to work on each section, so you need to work quickly and steadily. Avoid focusing on one problem for too long. Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test. On the night before the test, gather together the materials you will need the next day: - Your admission ticket - Two forms of identification (e.g., driver's license, student identification card, or current alien registration card) - Two No. 2 pencils with erasers - Directions to the test center - A watch (if you wish) but not one that makes noise, as it may disturb other test-takers On the day of the test, you should wake up early (after a good night's rest) and have breakfast. Dress comfortably, so that you are not distracted by being too hot or too cold while taking the test. Also, plan to arrive at the test center early. This will allow you to

collect your thoughts and relax before the test, and will also spare you the stress of being late. If you arrive after the test begins, you will not be admitted to the test center and you will not receive a refund. During the Test When you arrive at the test center, try to find a seat where you feel most comfortable. Follow all the rules and instructions given by the test supervisor. If you do not, you risk being dismissed from the test and having your scores canceled. Once all the test materials are passed out, the test instructor will give you directions for filling out your answer sheet. Fill this sheet out carefully since this information will appear on your score report. After the Test When you have completed the SAT II: Chemistry Subject Test, you may hand in your test materials and leave. Then, go home and relax! When Will I Receive My Score Report and What Will It Look Like? You should receive your score report about five weeks after you take the test. This report will include your scores,

percentile ranks, and interpretive information.

Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the

most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada. ABOUT THE TEST The SAT II: Physics Subject Test is developed by the College Board and administered by Educational Testing Service (ETS). The test development process involves the assistance of educators throughout the United States, and is designed and implemented to ensure that the content and difficulty level of the test are appropriate. Although some colleges require

SAT II: Subject Tests as part of their admissions process, most colleges use the scores from the SAT II: Subject Test for student placement purposes. Test scores are used as a means of determining a student's aptitude for a particular course of study. The SAT II: Subject Test in Physics is one hour in length and consists of 75 multiple-choice questions. These questions are designed to measure your knowledge of physics and your ability to apply that knowledge. The general difficulty level of the test is designed for students who have taken a one-year introductory course in high school physics. To assist you in preparing for the exam, the College Board has provided the following list of exam topic percentages: mechanics (34-38% of exam); electricity and magnetism (22-26%); waves (15-19%); heat, kinetic theory, and thermodynamics (8-12%); modern physics (8-12%); miscellaneous (measurement, math skills, laboratory skills, history of physics, 2-4%). Concept

application percentages are also provided: recall (20-33%); single-concept problem (40-53%); multiple-concept problem (20-33%). Primarily, the test assesses your knowledge and understanding of the most significant concepts in physics and your ability to apply that knowledge. Laboratory experience will contribute to your understanding of some of the questions on the test. Since the mathematical calculations are limited to simple algebraic, trigonometric, and graphical relationships, students are not permitted to use electronic calculators or slide rules during the test. For the majority of the test, metric units are used. For information on upcoming administrations of the exam, consult the publication Taking the SAT II: Subject Tests, which can be obtained from your guidance counselor or by contacting: College Board SAT II Program P.O. Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global

disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve

and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

ABOUT THE BOOK This book provides you with an accurate and complete representation of the SAT II: English Language Proficiency Test (ELPT). The four sample tests are based on the most

recently administered ELPT examination. Our reviews are designed to prepare you for the types of questions you can expect to see when taking the actual test. You will be given one hour to complete each sample test. The sample tests contain every type of question that you may expect to appear on the actual exam. Following each test you will find an answer key and detailed explanations which are designed to help you understand the test material. Copies of this book include audio cassettes, containing the listening comprehension sections from the four sample tests. These tapes will help you improve your listening skills and prepare you for the listening comprehension portions of the ELPT. ABOUT THE TEST Who Takes the Test and What is it Used for? Any American secondary school student with English as a second language or limited English proficiency who has had at least two years of high school study in the United States can take this exam. The

English Language Proficiency Test is used to measure your reading and listening skills in English. Unlike English test that focus on grammar and language structure, the ELPT uses everyday-life examples to test a student's ability to function in an English-speaking environment. The test is used by colleges and universities as an indicator of a student's ability to use English in life situations. It can also be used as a measure for academic placement. Students entering the workforce can use the ELPT to demonstrate their ability to understand written and spoken English. Who Administers the Test? The ELPT is developed and administered by the Educational Testing Service (ETS). The questions for the ELPT are developed by language specialists who follow standardized procedures which ensure a high quality of work. All questions are reviewed by many people, revised as necessary, and then are administered in trial test situations, before being

compiled into a test format. According to ETS, the tests are then reviewed, using specific procedures, to ensure that they are free from cultural bias and that they will properly measure student's knowledge. When Should the ELPT Be Taken? The ELPT should be taken by American high school students who have completed two to four years of training in an English as a Second Language program or an English enrichment course. The examination should be taken prior to graduation from high school. When and Where is the Test Given? The ELPT is administered twice a year, once at SAT test centers and once at participating high schools. The first test administration date is in November at SAT test centers. The second administration date is in April at participating high schools. To receive information on upcoming administrations of the exam, consult the publication Taking the SAT II: Subject Tests, which can be obtained from your guidance counselor or by contacting:

Test. Consult the publication
Taking the SAT II: Subject

structure. Financial assistance
may be granted in certain
situations. To find out if you
qualify and to register for
assistance, contact your
academic advisor. HOW TO
USE THIS BOOK What Do I
Study First? Before you do
anything else, you should take
the first practice test which
appears after the two review
sections. After you complete
this test, you will be able to
determine what areas are
causing you difficulty and
should be studied first, so that
you can strengthen your
weaknesses. After you have
thoroughly studied the areas
with which you are having
problems, you may want to
retake Test 1 to gauge your
improvement in these areas.

When you feel comfortable
with the areas which have
previously caused you
difficulty, you should then
begin reviewing and preparing
for each section of the ELPT.
When should I start studying?
It is never too early to start
studying for the ELPT, the
earlier the better. You should
start studying as soon as
possible so that you will be
able to learn more. Make sure
you take the first practice test
before you start studying can
help you strengthen your
problem areas before you run
out of time to study. Last
minute studying and cramming
is not an efficient way to study
and does not allow you to learn
the material which you will
need to know for the exam.
How else can I improve my
English speaking and writing
skills while preparing for the
test? In addition to using Test 1
to determine your problem
areas, make sure you study all
of the reviews. The reviews will
cover the information you will
need to know for the exam. You
should also test yourself by
completing as many of the

practice tests as you possibly can. Besides using this book, there is one way you can familiarize yourself with written English - READ! Reading will help you improve your writing skills because you will have become acquainted with correct structure and phrasing in written English. You should read newspaper and magazine articles and advertisements. Read the college admissions material and college catalogs of the schools to which you are applying. You should also read books of interest to you. Just make sure you read, read, READ! There are many ways you can familiarize yourself with spoken English. If you are in your car, turn on the radio. Listening to radio newscasts and weather reports can also help prepare you for the test. You should watch television documentaries, go to lectures, and even go to the movies. Doing all of these things will help your perception of spoken English and will help prepare you for the listening comprehension sections, and

may even aid in building your vocabulary. **FORMAT FOR THE ELPT Section / Time Allotted / Questions** Part A: Listening Comprehension - Rejoinders / 10 minutes / 14 questions Part B: Reading Comprehension - Realia / 30 minutes / 42 questions Part C: Listening Comprehension - Narratives and Dialogues / 20 minutes / 28 questions The ELPT will take about one hour to complete, plus about 20 minutes of administration time. All of the questions in the ELPT will be multiple choice. Each question is rated as either superior, advanced, or intermediate. These ratings distinguish the difficulty level of a question and aids in scoring the student's proficiency rating. Each question will have four answer choices from which to choose. You should be aware of the amount of time you have to complete each section of the test, so that you do not waste too much time working on difficult questions, while neglecting to answer easy questions. Speed is very important. Using the practice

tests will help you prepare for this. Taking as many of the practice tests as possible, and making sure to time yourself, will help you become accustomed to the time constraints. Repeating this process will help you develop speed in answering the questions because you will become more familiar with the format. First, make sure you know how much time you have to complete each section. Second, read the directions to each section so that you understand it completely. Third, you should become familiar with the three parts of the ELPT. These sections are:

PART A: Listening Comprehension - Rejoinders In this section, which makes up 17 percent of the test, your ability to respond to and understand spoken English will be tested. A tape recording of conversations will be played for you. You will then have seven seconds to choose the answer that would best continue the conversation. The questions, the conversations, and the answer choices will not appear

in your test booklet. When you take the sample tests, take Part A for Tests 1-4 by using the provided tapes. Students will be given 10 minutes to complete the 14 questions in Part A. To study for this section, turn to the Listening Comprehension Review - Rejoinders. **PART B: Reading Comprehension - Realia** This section, which makes up 50 percent of the test, will test your ability to understand written English through published material such as signs, advertisements, directions, menus, labels, tickets, and street signs. The items in this section will include a piece of "realia" and test the students' ability to understand its content. Students will be given 30 minutes to complete the 42 questions in Part B. To study for this section, turn to the Reading Comprehension Review - Realia. **PART C: Listening Comprehension - Narratives and Dialogues** This part, which makes up 33 percent of the test, will have several spoken announcements

or conversations which the students listen to and then answer questions about the content or main points of what was said on the tape. The students will be given 12 seconds to complete each question. Part C has 28 questions that must be completed in 20 minutes. To study for this section, turn to the Listening Comprehension Review - Narratives and Dialogues. ABOUT THE REVIEW SECTIONS Our reviews are written to help you understand the concepts behind the questions which will be asked in the ELPT. They will help you to prepare for the actual test. They contain study tips on how to choose the best answer quickly and accurately. Also, there will be many drills which will help you in studying for the ELPT. You should use the reviews in conjunction with the diagnostic test and its cross-referencing table, which can show you what areas you need to study the most. The three review sections in this book correspond to the test sections of the official ELPT.

Listening Comprehension Reviews Both Listening Comprehension parts of the ELPT (Rejoinders and Narratives and Dialogues) will be discussed in great detail in this review. It will illustrate for you the different forms of questions that may appear in those parts of the ELPT. Through using this review, you will learn how to listen for key words and phrases. A number of study tips have been included to help you concentrate more effectively and choose the correct answer quickly. Reading Comprehension Review This review will describe for you the "realia" that will be presented in Part B of the ELPT. The review will help you learn how to understand the content of various signs, menus, directions, etc. STUDYING FOR THE ELPT At first glance, the ELPT may appear to be primarily a test of written English. However, the ELPT not only tests your written English ability., but it also tests your ability to understand spoken English. By using the

tests contained in this book, you will be able to develop your abilities in both of these areas. It is important for you to discover the time and place that works best for you. Some students may set aside a certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day, while waiting on line, or they may even listen to English tapes while doing chores. Only you can determine when and where your study time will be most effective. The most important factor to keep in mind is consistency. Work out a study routine and stick to it! You may want to follow a schedule similar to the one presented at the beginning of this book. Depending on how long before the exam you begin to study, you may want to add to this schedule or condense it. Be sure to take the first practice test before you begin studying the reviews in this book. By taking the practice test before studying you will determine your strengths and

weaknesses, enabling your studying to be more concise and effective. When you take the practice tests, you should sit down at a quiet table and time yourself. Try to make the conditions as much like a test center as possible by removing all distractions. Afterwards, you should check each answer and thoroughly review the reasoning behind each question that you missed. You should not review too much at one time. Concentrate on each of your problem areas individually, until you feel comfortable with your ability in each of those areas. Write in the margins and spaces of this book when practicing, and write in the test booklet when taking the test. You should use this space to make notes to yourself, especially notes to go back to a certain question. You should also cross out answers that you know are incorrect. Although you can write in your test booklet, make sure you do not write anything on your answer sheet, except to mark the answer you chose. Keep track of your scores! You will

be able to gauge your progress and discover general weaknesses in particular sections. You may find it very helpful to work with someone else. If possible, you should find a friend or classmate who is also taking the test. You may even find it convenient to ask a native speaker of English to help you practice.

ELPT TEST-TAKING TIPS

You may be unfamiliar with standardized tests such as the ELPT. There are many ways to acquaint yourself with this type of examination. Listed below are points to help you become familiar with the ELPT, some of which may be applied to other standardized tests.

How to Beat the Clock

Become comfortable with the format of the exam. When you are practicing to take the ELPT, pretend that you are under the same time constraints as you would during the test. Stay calm, pace yourself, and pay attention to the clock. Practice these techniques thoroughly. After simulating the test only a few times, you will be better able to sit down for the actual

ELPT much more confidently and boost your chances of doing well. Become familiar with the directions. Make sure you understand them before you take the exam, so that you do not waste valuable time on the exam. Know the format for each section before you actually take the test. This will not only save you valuable time, but also ensure that you are familiar enough with the exam to avoid nervousness (and the mistakes that come from being nervous). Work on the easier questions first. Mark the very difficult questions (in the test booklet, not on the answer sheet) and continue. Remember, only correct answers will be counted in your score. You will not be penalized for guessing, so when you have either answered or marked all of the questions, go back and answer any of the difficult questions that you may have skipped. If you find yourself working too long on one question, mark it and go on. Be sure that you are marking your answer in the space that corresponds to the number of

the question in the test booklet. Know how much time is allowed for each section. Remember that you are racing against the clock. This is why you should not spend too much time on a single question. Budget your time. Every question has the same value, whether it is difficult or easy, so it is important to move on if a question becomes too time consuming. Pace yourself and make sure to check your time periodically to make sure that you are moving at a good rate. Should I Guess? If you don't know the answer to a question, guess! Cross out and eliminate answers (in the test booklet) that you know are wrong, and then pick the best answer from the ones that are left. Even if you can't eliminate any answers, guess anyway! Remember that there is no penalty for guessing, and only correct answers are counted. If you guess, you may increase your number of correct answers. The Day of the Test On the day of the test, you should wake up early (hopefully after a decent night

's rest) and have a good breakfast. Make sure you dress comfortably, so that you are not distracted by being too hot or too cold while taking the exam. You should plan to arrive at the test site early. By being early, you will spare yourself the anxiety of being late for the test. It will also allow you to collect your thoughts and to relax before taking the exam. Before you leave your home, make sure you have all the necessary information to be admitted into the test site. You should consult your ELPT handbook for exact requirements. Make sure you bring at least two sharpened #2 (or HB) pencils, with erasers, to the exam. The pencils should be medium-soft with black lead. You may want to wear a watch to the test site; however, only ordinary watches will be permitted. Watches with alarms, calculator functions, flashing lights, beeping sounds, etc., will not be allowed in the test site. No food will be allowed into the examination room. During the Test When you

arrive at the test center, you will be assigned a seat in the examination room by a member of the test site staff. You will not receive a break during the examination. If you need to use the rest room, or if you become ill, you may leave the examination room, but you must first give the test supervisor your identification documents before you leave the room. If you do leave the room, you will not be allowed to make up any lost time. Once you enter the test site, follow all the instructions given by the test supervisor. If you do not, you risk being dismissed from the examination or having your ELPT scores voided (they will not be scored). Your answer sheet will not be scored and your test payment will not be refunded if you try to remove a test booklet, an answer sheet, or any tape from the test center. All the test materials are the property of Educational Testing Service and legal action may be taken against you if you try to take home test materials or copy them in any way. There are also regulations

that, if not followed, will void your answer sheet and then your test payment will not be refunded for any reason. Check your ELPT handbook for a list of these regulations. When all of the test materials have been passed out, the test instructor will give you directions for filling out one side of your answer sheet. You must fill out this sheet carefully since this information will be printed on your score report. Fill out your name exactly as it appears on your identification documents, unless otherwise instructed. Remember to write in the margins and spaces of your test booklet, leaving notes for yourself to return to a question, or just to cross out incorrect answers. Make sure you do not write on your answer sheet, except to fill in the oval corresponding to the answer you chose. You will be marking your answers on the side two of your answer sheet. Each numbered row will contain four ovals corresponding to each answer choice for that question. Fill in the oval which corresponds to

your answer darkly, completely, and in a neat manner. You can change your answer, but remember to completely erase your old answer. Only one answer should be marked. This is very important, as your answer sheet will be scored by machine and stray lines or unnecessary marks may cause the machine to score your answers incorrectly. Only work on the section of the test which the test instructor has instructed you to work on. You should begin only when instructed to do so, and stop, immediately, when instructed to end. Do not turn to the next section of the test until you are told to do so. When all of the sections have been completed, you should remain seated until all of the test materials have been collected. You will have to wait for your test results to arrive in the mail, which usually takes about one month.

Left Is Not Right: Take the Quiz Martin Byrne 2018-03-19
Concerned and confused about all the propaganda and hypocrisy from the Liberal

Left? But really, how bad is it? Do they lie, manipulate the facts, have selective memory, and hate everyone that does not share their views? Is all this possible from the ever tolerant, diversity loving Liberal Left? "LEFT IS NOT RIGHT" will shed some light on this subject in a fun quiz format of 50 multiple choice questions. Take the quiz and see how bad it really is! Many are appalled at the indoctrination of children that is practiced in tyrannical countries that restrict freedom and personal liberties. These countries are teaching children what to think, not how to think. Are those same indoctrination techniques taking place in public schools across the United States? The Liberal Left constantly lectures about the importance of freedom of speech, freedom of the press, diversity and tolerance. Do they really believe this or are they just serving their agenda only when convenient? Would the Left ever take a position to limit free speech? Do they tolerate different viewpoints

and diversity as they demand from others? Are some mainstream media outlets serving the liberal agenda? Are they providing unfiltered information so an informed public can reach an educated conclusion? Do mainstream media outlets try to influence their audience with controlled reporting? Upon becoming elected President, Donald Trump instituted a "Travel Ban" that caused the Liberal Left to attack the President and Trump was branded a racist bigot. The Left stated that there was no basis for the "Travel Ban" and all the President wanted to do was prevent Muslims from entering the U.S. Did the President really issue a permanent ban? Was the ban on all Muslim countries? Was the President really trying to keep America safe as he stated? There is a lot of talk about the left leaning agenda of college and university professors and their desire to promote a socialist, anti-American, and liberal mindset in the classroom and eventually in society. Would

college and university professors really do this? What did colleges and universities do when Clinton lost the election? What do they believe causes racism? The Liberal Left has been on a campaign to remove symbols, statues and monuments they believe don't have any historical value and only promote and honor slavery and oppression. Did the Left forget to look in the mirror during this process? Are there any symbols, statues or monuments associated with the Liberal Left that fall into this category? Did the Left miss a few items on their quest to purge history? There is a lot of debate around illegal immigration and U.S. southern border control, along with the associated economics and U.S. citizen safety issues. Does the Mexican Government actually provide guidance on how to evade U.S. Immigration and Customs Enforcement (ICE)? Does the Mexican Government practice what they preach regarding illegal immigration? Are illegal immigrants able to collect U.S. taxpayer funded

benefits? The answers to these questions and more are presented in the "LEFT IS NOT RIGHT" quiz book. So get your friends and get started!

American Government: In the United States, the government gets its power to govern from the people. We have a government of the people, by the people, and for the people. Citizens in the United States shape their government and its policies, so they must learn about important public issues and get involved in their communities. Learning about American government helps you understand your rights and responsibilities and allows you to fully participate in the American political process. The Founders of this country decided that the United States should be a representative democracy. They wanted a nation ruled by laws, not by men. In a representative democracy, the people choose

officials to make laws and represent their views and concerns in government. This book will help you understand the principles of American democracy, the U.S. system of government, and the important rights and responsibilities of U.S. citizenship.

ABOUT THE TESTThe Advanced Placement Program is designed to allow high school students to pursue college-level studies while attending high school. The three-hour five-minute AP U.S. History exam is usually given to high school students who have completed a year's study in a college-level U.S. History course. The test results are then used to determine the awarding of course credit and/or advanced course placement in college. According to the College Board, students taking this exam are called upon to demonstrate systematic factual knowledge and bring to bear critical, persuasive analysis of the full sweep of U.S. history. This is why we make every

effort to establish and build upon context for you, rather than encouraging rote memorization of disconnected facts. The AP U.S. History Exam is divided into two sections: 1) Multiple-Choice: This section is composed of 80 multiple-choice questions designed to gauge your ability to understand and analyze U.S. history from the Colonial period to the present. The majority of the questions, however, are based on 19th- and 20th-century history. This section tests factual knowledge, scope of preparation, and knowledge-based analytical skills. You'll have 55 minutes to complete this section, which accounts for 50 percent of your final grade. 2) Free-Response: This section is composed of three essay questions designed to measure your ability to write coherent, intelligent, well-organized essays on historical topics. The essays require you to demonstrate mastery of historical interpretation and the ability to express views and knowledge in writing. The

essays may relate documents to different areas, analyze common themes of different time periods, or compare individual and group experiences which reflect socioeconomic, racial, gender, and ethnic differences. Part A consists of a mandatory 15-minute reading period, followed by 45 minutes during which you must answer a document-based question (DBQ), which changes from year to year. In Part B the student chooses to answer on two of the topics that are given. You will have 70 minutes to write these essays. The free-response section counts for 50 percent of your final grade. These topics are broken down into thirds: - Political Institutions (1/3rd)- Social and Economic Change (1/3rd)- Behavior and Public Policy, Diplomacy and International Relations, Intellectual and Cultural Development (1/3rd) The time periods covered are as follows: - Pre-Colonial through 1789 (1/6th of exam)- 1790-1914 (1/2 of exam)- 1915-present (1/3rd of exam) ABOUT

THE REVIEW SECTIONThis book begins with REA's concise yet thorough 230-page review of U.S. history designed to acquaint you with the exam's scope of coverage. Our review covers these topics and historical time periods: - The Colonial Period (1500-1763)- The American Revolution (1763-1787)- The United States Constitution (1787-1789)- The New National (1789-1824)- Jacksonian Democracy and Westward Expansion (1824-1850)- Sectional Conflict and The Causes of the Civil War (1850-1860)- The Civil War and Reconstruction (1860-1877)- Industrialism, War, and the Progressive Era (1877-1912)- Wilson and World War I (1912-1920)- The Roaring Twenties and Economic Collapse (1920-1929)- The Great Depression and the New Deal (1929-1941)- World War II and the Post-War Era (1941-1960)- The New Frontier, Vietnam, and Social Upheaval (1960-1972)- Watergate, Carter, and the New Conservatism (1972-2001)

SCORING THE EXAMThe multiple-choice section of the exam is scored by crediting each correct answer with one point and deducting one-fourth of a point for each incorrect answer. You will neither receive a credit nor suffer a deduction for unanswered questions. The free-response essays are graded by instructors and professors from across the country who come together each June for a week of non-stop AP essay grading. Each essay booklet is read and scored by several graders. Each grader provides a score for the individual essays. The DBQ is scored on a scale from 0 to 15, 0 being the lowest and 15 the highest. Each topic-based essay receives a score from 0 to 9. These scores are concealed so that each grader is unaware of the previous graders' assessments. When the essays have been graded completely, the scores are averaged-one score for each essay-so that the free-response section generates three scores. The total weight of the free-response section is 50 percent

of the total score. Your work in the multiple-choice section counts for the other 50 percent. Each year, grades fluctuate slightly because the grading scale is adjusted to take into account the performance of the total AP U.S. History test-taker population. When used with the corresponding chart, the scoring method we present here will strongly approximate the score you would receive if you were sitting for the actual AP U.S. History exam.

SCORING THE MULTIPLE-CHOICE SECTION

For the multiple-choice section, use this formula to calculate your raw score: $\text{Number right} - (\text{number wrong} \times 1/4) = \text{raw score}$ (round to the nearest whole number)

SCORING THE FREE-RESPONSE SECTION

For the free-response section, use this formula to calculate your raw score: $\text{DBQ} + \text{Essay \#1} + \text{Essay \#2} + \dots = \text{raw score}$ (round to the nearest whole number) You may want to give your essays three different grades, such as a 13, 10, and an 8, and then

calculate your score three ways: as if you did well, average, and poorly. This will give you a safe estimate of how you will do on the actual exam. Try to be objective about grading your own essays. If possible, have a friend, teacher, or parent grade them for you. Make sure your essays follow all of the AP requirements before you assess the score. The statistical formulations used by the AP Program preclude our REA practice-test scoring system from precisely replicating the procedures and determinations of the AP Program. Bear in mind that the cut-off point between each of the five AP grades typically shifts slightly from year to year. This occurs both because one year's exam cannot be expected to be exactly as difficult as another year's and because no two test-taker groups can be expected to be equally strong. THE COMPOSITE SCORE To obtain your composite score, use this method: $1.13 \times \text{multiple choice raw score} = \text{weighted multiple-choice score}$ (do not

round) $2.73 \times$ free response raw score = weighted free response score (do not round) Now, add the two weighted sections together and round to the nearest whole number. The result is your total composite score. See the range within which your score falls on this table to approximate your final grade: AP Grade / Composite Score Range
5 / 114-1804 / 91-1133 / 74-902 / 49-731 / 0-48
These overall scores are interpreted as follows: 5-extremely well qualified; 4-well qualified; 3-qualified, 2-possibly qualified; and 1-no recommendation. Most colleges grant students who earn a 3 or better either college credit or advanced placement. Check with your high school's guidance office about specific requirements.

procedures as well as instructions on how to register for the AP Examination in United States History. Here's how to contact the College Board: Advanced Placement Program Dept. E-22 P.O. Box 6670 Princeton, NJ 08541-6670 Phone: (609) 771-7300 Website: <http://www.collegeboard.com/ap>

Summary of Killing the Mob
Alexander Cooper 2021-07-09
Summary of Killing the Mob In Killing the Mob, Bill O'Reilly and Martin Dugard recount the history of organized crime in the United States and describe the concerted efforts that various government agencies and officials took to bring key figures in the criminal underworld to book. Killing the Mob is divided into three parts bookended by a prologue and postscript. The first part, titled "The Gunners," covers the exploits of the infamous serial robbers of the 1930s, including John Dillinger, "Pretty Boy" Floyd, and Bonnie and Clyde, and the brutal violence that came to define that decade. The second part, "The

Corruptors,” traces the rise of the Italian-American Mafia, alternately known as the Mob, Syndicate, or Cosa Nostra, from the time it helped change the course of the Second World War in 1943 to the time it infiltrated John F. Kennedy’s presidential campaign in 1960. The last part, “The Subversives,” documents the ways the Mob invaded every facet of American life— from movies and music to labor unions and presidential elections— and relates the investigations, the cunning, and the betrayal that eventually crippled much of its influence and activity in the mid-1980s. Although the scope of *Killing the Mob* is the period between the 1930s and mid-80s, O’Reilly and Dugard go back and forth in time to place key events in context. They chronicle the arrival of Italian immigrants in New York City in the early 1900s, Prohibition in 1920, and the Great Depression that started in 1929 to explain how organized crime was birthed and how it spread across the

country. In the postscript, the authors narrate what happened to the last of the old-school mobsters and the crime families they led. Here is a Preview of What You Will Get:
