The Pope's Children David McWilliams 2011-01-11 Named for the ironic coincidence of the Irish baby boom of the 1970s, which peaked nine months to the day after Pope John Paul II's historic visit to Dublin, *The Pope's Children* is both a celebration and bitingly funny portrait of the first generation of the Celtic Tiger—the beneficiaries of the economic miracle that propelled Ireland from centuries of deprivation into a nation that now enjoys one of the highest living standards in the world.
Fuzzy Engineering Toward Human Friendly Systems Toshiro Terano 1992 Comprising papers presented at an international symposium on fuzzy engineering technology, this volume provides information on the current state-of-the-art in the field of fuzzy theories and applications, and their importance in the areas of industry, medicine, artificial intelligence, management, socio-economics, ecology, agriculture, behavioural science and education. The results of recent research of LIFE (Laboratory for International Fuzzy Engineering Research) are also included.

Product Strategy and Corporate Success C B Rao 2019-10-17 Product strategy is the key driver of business strategy and corporate success. This book brings out several important aspects of product strategy, drawing upon examples from the Indian automobile industry, which is verily the bellwether of the Indian economy. The automobile industry is not only a strategic industry economically but also an instructive industry intellectually. The industry is the cradle of modern management and is a synthesis of various functional strategies. The growth of the automobile industry or, for that matter, any consumer-facing industry lies in its ability to maintain a continuous pipeline of new and innovative products, substantive in functionality and stylistic in appearance. The automobile industry provides the perfect backdrop for discussing products as the core of the corporate business strategy. The global automobile industry, including the Indian automobile industry, is at an inflection point with portends of an unprecedented transformation. The drivers of this transformation are already seen in terms of connected vehicles, autonomous mobility, electric vehicles and digital technologies. The book, through its eighty chapters, demonstrates the synergistic interplay between technology and business, strategy and execution, innovation and inventiveness, enterprise and regulation, indigenization and globalization, structure and process, resourcing and spend, and leadership and management. This interplay would determine India's ability to become a major player in this transformation. This book will be of interest to industry professionals, policy makers, the academic community and the general public.

America in JeruSALEm Anat First 2009-10-26 In *America in JeruSALEm*, the authors examine the effects of globalization and Americanization on the national identity of small nations. Using Israel as a case study, First and Avraham analyzed the changes in Israeli advertising over the past two decades. They found that since the '90s, Israeli advertisers began using American symbols, values, sights, and heroes to promote diverse products without any consideration of the place they were actually made. The perspective offered in this book_a consideration of advertising as a locus of the tension between national identity and globalization/Americanization_is an innovative one, generating a model that can be used to analyze national identity through advertising in the age of globalization/Americanization. Although many books have focused on numerous aspects of Israeli society, *America in JeruSALEm* offers a new and accessible perspective on the changes in Israeli identity.

Granular Computing and Intelligent Systems Witold Pedrycz 2011-04-28 Information granules are fundamental conceptual entities facilitating perception of complex phenomena and contributing to the enhancement of human centricity in intelligent systems. The formal frameworks of information granules and information granulation comprise fuzzy sets, interval analysis, probability, rough sets, and shadowed sets, to name only a few representatives. Among current developments of Granular Computing, interesting options concern information granules of higher order and of higher type. The higher order information granularity is concerned with an effective formation of information granules over the space being originally constructed by information granules of lower order. This construct is directly associated with the concept of hierarchy of systems composed of successive processing layers characterized by the increasing levels of abstraction. This idea of layered, hierarchical realization of models of complex systems has gained a significant level of visibility in fuzzy modeling with the well-established concept of hierarchical fuzzy models where one strives to achieve a sound tradeoff between accuracy and a level of detail captured by the model and its level of interpretability. Higher type information granules emerge when the information granules themselves cannot be fully characterized in a purely numerical fashion but instead it becomes convenient to exploit their realization in the form of other types of information granules such as type-2 fuzzy sets, interval-valued fuzzy sets, or probabilistic fuzzy sets. Higher order and higher type of information granules constitute the focus of the studies on Granular Computing presented in this study. The book elaborates on sound methodologies of Granular Computing, algorithmic pursuits and an array of diverse applications and case studies in environmental studies, option price forecasting, and power engineering.

Marketing Management, 3rd Edition Kumar Arun & Meenakshi N. In today's socially networked and highly competitive world, it is imperative that marketers are always truthful because customers eventually find out if they have been misled. This can lead to their angst with the company going viral, thereby destroying the company's reputation. Marketing Management advocates 'marketing based on absolute truth'.Also brand image is sensitive to market sentiments. Brands can be in danger: one wrong product or one shoddy campaign can destroy a brand built over years. Companies must align everything that they do with the core spirit of their brands.Further, when everything seems to go digital, it is important that marketers keep in mind that customers are primarily interested in their products/services. The book advocates that superior products and services will always be central to marketing.Key FeaturesBest Practices• Researched, implemented, and result-driven practices taken from leading companies across diverse industries throughout the world• Marketers can adopt these practices to elevate individual and organizational performanceCorporate Insights• Examples of marketing concepts being implemented by well-known Indian companies and brands• Latest moves of companies and brands as they cope with competition and environmentCase Studies• A brief case study after each chapter, focusing on specific issues dealt within the chapterSpecialized Questions• Questions meant to make students ponder upon various aspects of marketing and challenge the existing paradigms
