Reality and Accounting Richard Mattessich 2013-07-31 This book discusses and summarizes the revived interest in reality issues (ontology) within accounting, economics, and the information sciences, with a view to informing scholars from these different disciplines about each other's endeavours in ontological research. Even more importantly, the book aims at familiarizing scholars from various disciplines with an evolutionary approach for examining questions about reality in the social sciences. The book is based on a partly pluralistic approach that assures unity in diversity. Unity, because all existence arises from physical reality; diversity, because emergent properties create biological and social realities that cannot be reduced to physical phenomena. Hence, the book recognizes not only concrete but also abstract entities. It shows, however, that the actualization of these abstract entities requires objectification and concrete manifestation. This pluralistic approach is central to this book. It also is a challenge to those who reject abstract entities as socially real, as well as to those who defend a non-realist position. The major task of this book is to explore proposals towards a

uniform ontological basis. This uniform and universal presentation extends beyond traditional ontology (asking 'what is real?') to such questions as 'on which reality level is something real?' and 'in which (temporal and modal) way is it real?'. Such an extended analysis is relevant to accountants, economists, information scientists, other social scientists as well as philosophers.

Communication in Accounting Education Richard M.S. Wilson 2016-04-14 Accounting, often described as "the language of business", requires a diverse set of written, listening and oral communication skills if those who practise it are to be effective. Given the pace of change relating to, for example, the evolution of international accounting standards and the demands for greater transparency, accountants must be clear, responsive, and audience-focussed communicators. Employers of accountants consistently comment on the need for their new graduate recruits and trainees to have strong written, oral, and interpersonal communication skills. In this light accounting educators face the challenge of designing and delivering programmes that reflect professional expectations on the part of employers and clients, and educating students on how to make informed communication choices in order to achieve desired results and to build good working relationships. The chapters in this book deal with such topics as accounting students' perceptions of oral communication skills; competence-based writing skills; and the development of listening skills. This book was originally published as Accounting Education: an international journal.

Business & Professional Ethics for Directors, Executives & Accountants Leonard J. Brooks 2017-02-21 Using real examples of ethical issues in today's workplace, BUSINESS & PROFESSIONAL ETHICS, 8E provides readers with the strategies needed to make the most ethical decisions possible -- no matter what the situation. By integrating the latest information on ethics, governance scandals, legal liability, and professional accounting and audit issues, this edition highlights the most recent ethical issues in today's business environment. The book examines the background and nature of the new stakeholder-support era of corporate and professional accountability and governance with valuable

insights into the effective behavior patterns of directors, executives, and accountants. More than 120 current cases and key readings provide an interesting, challenging, and practical learning experience. A Handbook of Malaysian Cases: Contemporary Issues in Marketing & Management Farzana Quoquab 2016-11-16 This book is appropriate and useful for the college and university lecturers, practitioners and students who are undertaking courses in business studies. It is widely acknowledged that, only theoretical discussion does not provide the comprehensive understanding about the business decision. This book will contribute in teaching as a tool to provide practical knowledge to the students and/or participants. Apart from the lecturers and students, practitioners also can be benefited from this book since it will provide them understanding about the problems and challenges faced by different types of companies. There is a growing need of reading and understanding the challenges faced by the managers from developing country perspective. Compared to the developed countries, the documentation of local cases are very few. As such, the present book taken the initiative to provide a selection of high-quality cases on Malaysia based companies and MNCs operating in Malaysia about their marketing and management related decision making issues. This book is unique in many ways. These cases not having been published before, provide a pool of fresh cases for teaching purpose. All eleven cases demonstrate different company issues and different managerial problems which certainly will enrich its readers' understanding about the phenomena. At the end of each case, suggested case assignment questions are provided so that the facilitator will have some preliminary understanding about the questions that can be discussed. Lastly, a brief synopsis of all cases is presented at the end of the book. It is hoped that, this book will provide the practical knowledge to its readers.

Is prior knowledge necessary for undergraduate computing courses? A study of courses offered by Mauritian universities Yeeshtdevisingh Hosanee 2016-07-18 Research Paper from the year 2016 in the subject Computer Science - Didactics, , language: English, abstract: Prior computing knowledge is not a pre-requisite for enrolling in many computing undergraduate courses at many universities. It is said that the difficulty of learning computer programming lies only with the logical thinking of the student, not because they did not have prior computing knowledge. Universities all around the world are putting tremendous effort to encourage and support students to acquire basic computing skills and computer programming skills. Therefore in this paper, an analysis of all undergraduate computing courses offered in 2015 by two main Mauritian universities, the University of Technology (UTM) and University of Mauritius (UOM) is carried out. This analysis includes two phases: the first one allows us to identify all computing courses which do not require prior computing knowledge at A-Level to enroll in these courses. The second phase will help us to identify the computing courses which are teaching computer programming. From the

two analysis we will be able to understand the number of computing courses not requiring computing at A level but will give non-computing A-level students the chance to learn computer programming at tertiary level.

Implementing Cross-Culture Pedagogies Pham Thi Hong Thanh 2013-11-27 During the last two decades Confucian heritage culture countries have widely promoted teaching and learning reforms to advance their educational systems. To skip the painfully long research stage, Confucian heritage culture educators have borrowed Western philosophies and practices with the assumption that what has been done

successfully in the West will produce similar outcomes in the East. The wide importation of cooperative learning practices to Confucian heritage culture classrooms recently is an example. However, cooperative learning has been documented in many studies not to work effectively in Confucian heritage culture classrooms. The reason is that the educators often impose this instructional method on the students without a careful consideration of its appropriateness in the socio-cultural context of Confucian heritage culture countries. This procedure is not effective and professional because learning does not stand alone. Rather, it is shaped and influenced by other factors including teaching methods, learning tasks, assessment demands, workload and the learning culture of students in the local context. For cooperative learning to work effectively in Confucian heritage culture classrooms, reformers need to consider the importation of this approach in line with a careful examination of all supports and constraints that affect those factors that are associated with learning. The volume provides an applied theoretical framework and culturally appropriate and practical instructions that could assist Confucian heritage culture educators and teachers to address various factors at multiple levels in order to optimize success in importing cooperative learning to their classrooms. Overall, it provides strategies to assist Confucian heritage culture teachers to change their teaching practices, redesign lessons plans, design assessment methods, and organize learning activities in a manner that can influence Confucian heritage culture students to shift from employing teacher-centered learning approaches to cooperative learning.

The Routledge Companion to Accounting Communication Lisa Jack 2013-05-02 One of the prime purposes of accounting is to communicate and yet, to date, this fundamental aspect of the discipline has received relatively little attention. The Routledge Companion to Accounting Communication represents the first collection of contributions to focus

on the power of communication in accounting. The chapters have a shared aim of addressing the misconception that accounting is a purely technical, number-based discipline by highlighting the use of narrative, visual and technological methods to communicate accounting information. The contents comprise a mixture of reflective overview, stinging critique, technological exposition, clinical analysis and practical advice on topical areas of interest such as: The miscommunication that preceded the global financial crisis The failure of sustainability reporting The development of XBRL How to cut clutter With an international coterie of contributors, including a communication theorist, a Big Four practitioner and accounting academics, this volume provides an eclectic array of expert analysis and reflection. The contributors reveal how accounting communications represent, or misrepresent, the financial affairs of entities, thus presenting a state-of-the-art assessment on each of the main facets of this important topic. As such, this book will be of interest to a wide range of readers, including: postgraduate students in management and accounting; established researchers in the fields of both accounting and communications; and accounting practitioners. *PC Mag* 1999-07 PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Handbook of Feminist Research Sharlene Nagy Hesse-Biber 2012 The second edition of the Handbook of Feminist Research: Theory and Praxis, presents both a theoretical and practical approach to conducting social science research on, for, and about women. The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies, methodologies, and methods that have had a significant impact on feminist research practice and women's studies scholarship. The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible. It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change. It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology, methodology and method. The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change.
