**Napoleon's Egypt**
Juan Cole 2007-08-07
In this vivid and timely history, Juan Cole tells the story of Napoleon's invasion of Egypt. Revealing the young general's reasons for leading the expedition against Egypt in 1798 and showcasing his fascinating views of the Orient, Cole delves into the psychology of the military titan and his entourage. He paints a multi-faceted portrait of the daily travails of the soldiers in Napoleon's army, including how they imagined Egypt, how their expectations differed from what they found, and how they grappled with military challenges in a foreign land. Cole ultimately reveals how Napoleon's invasion, the first modern attempt to invade the Arab world, invented and crystallized the rhetoric of liberal imperialism.

It focuses on information relating to the unique needs and demands of religious publications, such as discussions on how to correctly quote the Bible, how to capitalize and use common religious terms, and how to abbreviate the books of the Bible and other religious words. Also included are rarely found items such as\* an author's guide to obtaining permissions\* guidelines for using American, British, and Mid-Atlantic styles\* discussions of inclusive language, profanity, and ethnic sensitivities\* discussions of Internet and computer-related language style\* a list of problem words\* style issues regarding words from major world religions\* a discussion of handling brand names in text\* a list of common interjections\* issues of type design, paper, copy-fit!This edition has been completely updated since the 1988 edition and contains more than twice as much information as the previous edition. This is the most detailed and comprehensive guide of its kind.

**Liquid Life: On Non-Linear Materiality**
Rachel Armstrong 2019-12-11
If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration: Rolf Hughes' "angelology" of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, Liquid Life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away. Rachel Armstrong is Professor of Experimental Architecture at Newcastle University (UK), and has also been a Rising Waters II Fellow for the Robert Rauschenberg Foundation (April-May 2016), TWOTY futurist in 2015, Fellow of the British Interplanetary Society, and a Senior TED Fellow in 2010. She is also the coordinator of the Living Architecture project, an EU-funded project that establishes the principles for our buildings to share some of the properties of living things, e.g. metabolism, operating at the intersection of architecture, building construction, bio-energy and synthetic biology. She is also the author of Vibrant Architecture (De Gruyter, 2015), Star Ark: A Living, Self-Sustaining Spaceship (Springer, 2017), and Soft Living Architecture: An Alternative View of Bio-informed Design Practice (Bloomsbury, 2018).

**Debt**
David Graeber 2012
Economic history states that money replaced a bartering system, yet there isn't any evidence to support this axiom. Anthropologist Graeber presents a stunning reversal of this conventional wisdom. For more than 5000 years, humans have used elaborate credit systems to buy and sell goods. Since the beginning of the agrarian empires, humans have been divided into debtors and creditors. Through time, virtual credit money was replaced by gold and the system as a whole went into decline. This fascinating history is told for the first time.

**A Military History of the Ottomans: From Osman to Atatürk**
Mesut Uyar Ph.D. 2009-09-23
The Ottoman Army had a significant effect on the history of the modern world and particularly on that of the Middle East and Europe. This study, written by a Turkish and an American scholar, is a revision and corrective to western accounts because it is based on Turkish interpretations, rather than European interpretations, of events. As the world's dominant military machine from 1300 to the mid-1700's, the Ottoman Army led the way in military institutions, organizational structures, technology, and tactics. In decline thereafter, it nevertheless remained a considerable force to be counted in the balance of power through 1918. From its nomadic origins, it underwent revolutions in military affairs as well as several transformations which enabled it to compete on favorable terms with the best of armies of the day. This study tracks the growth of the Ottoman Army as a professional institution from the perspective of the Ottomans themselves, by using previously untapped Ottoman source materials. Additionally, the impact of important commanders and the role of politics, as these affected the army, are examined. The study concludes with the Ottoman legacy and its effect on the Republic and modern Turkish Army. This is a study survey that combines an introductory view of this subject with fresh and original reference-level information. Divided into distinct periods, Uyar and Erickson open with a brief overview of the establishment of the Ottoman Empire and the military systems that shaped the early military patterns. The Ottoman army emerged forcefully in 1453 during the siege of Constantinople and became a dominant social and political force for nearly two hundred years following Mehmed's capture of the city. When the army began to show signs of decay during the mid-seventeenth century, successive Sultans actively sought to transform the institution that protected their power. The reforms and transformations that began frist in 1606successfully preserved the army until the outbreak of the Ottoman-Russian War in 1876. Though the war was brief, its impact was enormous as nationalist and republican strains placed increasing pressure on the Sultan and his army until, finally, in 1918, those strains proved too great to overcome. By 1923, Mustafa Kemal Atatürk emerged as the leader of a unified national state ruled by a new National Parliament. As Uyar and Erickson demonstrate, the old army of the Sultan had become the army of the Republic, symbolizing the transformation of a dying empire to the new Turkish state make clear that throughout much of its existence, the Ottoman Army was an effective fighting force with professional military institutions and organizational structures.

**Biomarkers in Drug Development**
Michael R. Bleavins 2010-02-15
Discover how biomarkers can boost the success rate of drug development efforts
As pharmaceutical companies struggle to improve the success rate and cost-effectiveness of the drug development process, biomarkers have emerged as a valuable tool. This book synthesizes and reviews the latest efforts to identify, develop, and integrate biomarkers as a key strategy in translational medicine and the drug development process. Filled with case studies, the book demonstrates how biomarkers can improve drug development timelines, lower costs, facilitate better compound selection, reduce late-stage attrition, and open the door to personalized medicine. Biomarkers in Drug Development is divided into eight parts: Part One offers an overview of biomarkers and their role in drug development. Part Two highlights important technologies to help researchers identify new biomarkers. Part Three examines the characterization and validation process for both drugs and diagnostics, and provides practical advice on appropriate statistical methods to ensure that biomarkers fulfill their intended purpose. Parts Four through Six examine the application of biomarkers in discovery, preclinical safety assessment, clinical trials, and translational medicine. Part Seven focuses on lessons learned and the practical aspects of implementing biomarkers in drug development programs. Part Eight explores future trends and issues, including data integration, personalized medicine, and ethical concerns. Each of the thirty-eight chapters was contributed by one or more leading experts, including scientists from biotechnology and pharmaceutical firms, academia, and the U.S. Food and Drug Administration. Their contributions offer pharmaceutical and clinical researchers the most up-to-date understanding of the strategies used for and applications of biomarkers in drug development.

*Revoluting Subjects*
Doctor Imogen Tyler 2013-04-11
Revoluting Subjects is a groundbreaking account of social abjection in contemporary Britain, exploring how particular groups of people are figured as revolting and how they in turn revolt against their abject subjectification. The book utilizes a number of high-profile and in-depth case studies - including 'chavs', asylum seekers, Gypsies and Travellers, and the 2011 London riots - to examine the ways in which individuals negotiate

restrictive neoliberal ideologies of selfhood. In doing so, Tyler argues for a deeper psychosocial understanding of the role of representational forms in producing marginality, social exclusion and injustice, whilst also detailing how stigmatization and scapegoating are resisted through a variety of aesthetic and political strategies. Imaginative and original, *Revoluting Subjects* introduces a range of new insights into neoliberal societies, and will be essential reading for those concerned about widening inequalities, growing social unrest and social justice in the wider global context.

**American Military History Volume 1**
Army Center of Military History 2016-06-05
American Military History provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

**Co-habiting with Ghosts**
Caron Lipman 2016-05-23
How does it feel to live in a 'haunted home'? How do people negotiate their everyday lives with the experience of uncanny, anomalous or strange events within the domestic interior? What do such experiences reveal of the intersection between the material, immaterial and temporal within the home? How do people interpret, share and narrate experiences which are uncertain and unpredictable? What does this reveal about contested beliefs and different forms of knowledge? And about how people 'co-habit' with ghosts, a distinctive self - other relationship within such close quarters? This book sets out to explore these questions. It applies a non-reductive middle-ground approach which steers beyond an uncritical exploration of supernatural experiences without explaining them away by recourse only to wider social and cultural contexts. The book attends to the ways in which households in England and Wales understand their experience of haunting in relation to ideas of subjectivity, gender, materiality, memory, knowledge and belief. It explores home as a place both dynamic and differentiated, illuminating the complexity of 'everyday' experience - the familiarity of the strange as well as the strangeness of the familiar - and the ways in which home continues to be configured as a distinctive space.

**A Guide to the Bodhisattava's Way of Life**
Shantideva 2017-01-01
Shantideva's Bodhisattvacharyavatara (A Guide to the Bodhisattva's Way of Life) holds a unique place in Mahayana Buddhism akin to that of the Dhammapada in Hinayana Buddhism and the Bhagavadgita in Hinduism. In combining those rare qualities of scholastic precision, spiritual depth and poetical beauty, its appeal extends to a wide audience of Buddhists and non-Buddhists alike. Composed in India during the 8th century of the Christian era, it has since been an inspiration to millions of people throughout the world. This present translation by Stephen Batchelor is based upon a 12th century Tibetan commentary as orally explained by Ven. Geshe Ngawang Dhargyey. The ninth chapter on wisdom has been expanded for this edition with relevant commentarial passages.

Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible assets, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

**Saul Bass**
Jan-Christopher Horak 2014-10-09
Food is a significant part of our daily lives and can be one of the most telling records of a time and place. Our meals – from what we eat, to how we prepare it, to how we consume it -- illuminate our culture and history. As a result, cookbooks present a unique opportunity to analyze changing foodways and can yield surprising discoveries about society's tastes and priorities. In *Kentucky's Cookbook Heritage*, John van Willigen explores the state's history through its changing food culture, beginning with Lettice Bryan's *The Kentucky Housewife* (originally published in 1839). Considered one of the earliest regional cookbooks, *The Kentucky Housewife* includes pre–Civil War recipes intended for use by a household staff instead of an individual cook, along with instructions for serving the family. Van Willigen also shares the story of the original Aunt Jemima -- the advertising persona of Nancy Green, born in Montgomery County, Kentucky -- who was one of many African American voices in Kentucky culinary history. *Kentucky's Cookbook Heritage* is a journey through the history of the commonwealth, showcasing the shifting priorities and innovations of the times. Analyzing the historical importance of a wide range of publications, from the nonprofit and charity cookbooks that flourished at the end of the twentieth century to the contemporary cookbook that emphasizes local ingredients, van Willigen provides a valuable perspective on the state's social history.

Others concentrate on particular bodies of evidence, ranging from inscriptions to ascetic literature, from registers to women's letters.

**Homelands and Diasporas**
Minna Rozen 2008-10-30
The Greek and Jewish diasporas are the most significant diasporas of Western civilisation. "Homelands and Diasporas" is the first book to explore the similarities and differences between these two experiences. In the process it sheds fascinating light on their fundamental importance for both Greek and Jewish societies. The authors examine Greek and Jewish diasporas throughout history, from classical and Biblical times to the present, and all over the world - in Greece, the Balkans, Turkey, Russia, the Near and Middle East, Spain and the US. They analyse the very nature of diaspora, examining both the Greek concept of noble expansion and the Jewish idea of enforced exile, and analyse community structures as well as social and religious networks, combining Scriptural analysis with cultural and political history. Diaspora is a difficult and emotive concept but "Homelands and Diasporas" offers a balanced and perceptive guide to the connected histories of these two peoples away from their homelands.

*Radicalisation and Media*
Andrew Hoskins 2011-02-03
This book examines the circulation and effects of radical discourse by analysing the role of mass media coverage in promoting or hindering radicalisation and acts of political violence. There is a new environment of conflict in the post-9/11 age, in which there appears to be emerging threats to security and stability in the shape of individuals and groups holding or espousing radical views about religion, ideology, often represented in the media as oppositional to Western values. This book asks what, if anything is new about these radicalising discourses, how and why they relate to political acts of violence and terror, and what the role of the mass media is in promoting or hindering them. This includes exploring how the acts themselves and explanations for them on the web are picked up and represented in mainstream television news media or Big Media, through the journalistic and editorial uses of words, phrases, graphics, images, and videos. It analyses how interpretations of the term 'radicalisation' are shaped by news representations through investigating audience responses, understandings and misunderstandings. Transnational in scope, this book seeks to contribute to an understanding of the connectivity and relationships that make up the new media ecology, especially those that appear to transcend the local and the global, accelerate the dissemination of radicalising discourses, and amplify media/public fears of political violence. This book will be of interest to students of security studies, media studies, terrorism studies, political science and sociology.

*Field manual for African archaeology* Alexandre Livingstone-Smith 2017 "This manual aims at explaining essential concepts pertaining to the practice of conducting archaeological field work in Africa. No fewer than 63 authors draw on their practical experience in the field to cover specific topics. It seeks to provide concise and readable notes that can be consulted in the field. Each chapter corresponds to a specific phase in the investigative process, from locating and excavating a site, to cataloguing and interpreting findings, and then publishing the results." --Home page

*Noise/music* Paul Hegarty "Noise/Music" looks at the phenomenon of noise in music, from experimental music at the early 20th century to the Japanese noise, music and glitch electronica of today. ... While it provides an excellent historical overview, the book's main concern is in the noise/music that has emerged since the mid 1970s, whether through industrial music, punk, free jazz or the purer noise of Merzbow. The book progresses seamlessly from discussions of John Cage, Erik Satie and Pauline Oliveros through to bands like Tropic of Cancer and the Boredoms. The author also examines the concept of noise from a philosophical perspective. Underpinned throughout by the ideas of Adorno, Deleuze and others, the author's writing is sharp and erudite. -- Summarized from back cover.

*Water Reuse* Blanca Jiménez 2008 Water Reuse: An International Survey of current practice, issues and needs examines water reuse practices around the world from different perspectives. The objective is to show how differently wastewater reuse is conceived and practised around the world as well as to present the varied needs and possibilities for reusing wastewater. In the first section water reuse practices around the world are described for regions having common water availability, reuse needs and social aspects. The second section refers to the "stakeholders" point of view. Each reuse purpose demands different water quality, not only to protect health and the environment but also to fulfil the requirements of the specific reuse. Reuses considered are agricultural, urban agriculture as a special case of the former,

municipal and industrial. Alongside these uses, the indirect reuse for human consumption through aquifer recharge is also discussed. The third section deals with emerging and controversial topics. Ethical and economical dilemmas in the field are presented as a subject not frequently addressed in this field. The role of governments in respect of public policy in reuse is discussed as well as the different international criteria and standards for reusing wastewater. The importance of public acceptance and the way to properly handle it is also considered. The fourth section of the book presents contrasting case studies; typical situations in the developed world (Japan and Germany) are compared to those in developing countries (Pakistan and Brazil) for agricultural and industrial reuse. Indirect planned reuse for human consumption (Germany) is compared with an unplanned one (Mexico). The Windhoek, Namibia case study is presented to emphasize why if the direct reuse of wastewater for human consumption has been performed with success for more than 35 years it is still the only example of this type around the world. To illustrate the difficulties of having a
