**Vintage American Road Racing Cars 1950-1969** Harold Pace Mark R. Brinker American road racing began just after World War II and quickly blossomed into a movement. The Sports Car Club of America (SCCA) and the United States Auto Club (USAC), clubs that became fierce rivals in the 1950s and 1960s, were the principal race promoters. Race tracks popped up everywhere, at first on city streets, then at airports and U.S. Air Force bases, and finally at purpose-built circuits like Road America and Laguna Seca.Although most of the cars that competed in American road racing were built in Europe, an underground movement sprang up of "special builders" who constructed their racers in home garages and small-town machine shops. Some were so homely and slow that only the builders could love them. Others trounced every Ferrari in sight and are now on the wish lists of wealthy collectors the world over.Vintage American Road Racing Cars 1950-1970 is the first book devoted exclusively to American road racing cars of all types and sizes. Hundreds of race cars built in America have never before been mentioned in print, and this book chronicles those and other cars with vintage and modern photography, specifications, memorabilia, and the stories and characters behind each car.About the AuthorHarold Pace's writing and photography has appeared in such magazines as Automobile Quarterly, Class & Sportscar, Excellence, Sports Car International, Vintage Racecar Journal, and others. He lives in Weatherford, Texas. Mark Brinker is a vintage race car enthusiast who has raced at the Monterey Historics. He is a doctor with three published medical textbooks and 70+ published scientific papers. He hails from Houston, Texas.

**An Arm and a Leg** Olive Balla 2014-12-12 Albuquerque divorcee Frankie O’Neil dreams of having a normal life. However, given her penchant for making the worst possible decisions about men and the fact she hoards food and hears the voices of dead relatives who hint at a dark family secret, her life is anything but normal. When her brother is shot minutes after leaving a package in her freezer, the police suspect her of murder and order her not to leave town. But sticking around brings on a new set of problems–trying not to fall in love with the deputy who suspects her of being a cannibalistic serial killer and proving her innocence by finding the real killers before they kill her. And, if finding a death threat written in children’s chalk beside a strangled bird on her front porch, dodging a speeding car intent on running her down, and barely escaping flames destroying her home are any indication, time is running out.

Dorrian finds that he’s in the middle of the madness. The serial killer then does something no one is expecting. He proclaims, in a letter to the media, that he is to be known as God’s Wrath and that he has been sent to kill all the false gods in Dark River. With the overwhelming number of fast-paced murders, Detective Warner T. Bradley and his partner, Detective Sam Weston, have no time to do a thorough investigation. In the midst of it all, Warner finds evidence that God’s Wrath and a past killer who had gotten away could be the same person. Just when the detectives are in deep desperation and have lost all hope, evidence is found that is so strong it gives Warner the name of the killer Dorrian Graves. Warner and Sam initiate the biggest manhunt they’ve ever been part a of. Dorrian is on the run and doesn't realize it, but he is set on a path from God that will lead him to death, violence, and his inevitable destiny. Who is The Light Giver? Is he from God, or is he a madman in disguise? Who is God’s Wrath? Will Dorrian choose to lose everything including his life in order to follow God’s plan?

*Racing Toward Zero* Kelly Senecal 2021-06-30 In Racing Toward Zero, the authors explore the issues inherent in developing sustainable transportation. They review the types of propulsion systems and vehicle options, discuss low-carbon fuels and alternative energy sources, and examine the role of regulation in curbing emissions.All technologies have an impact on the environment, from internal combustion engine vehicles to battery electric vehicles, fuel cell electric vehicles, and hybrids-there is no silver bullet. The battery electric vehicle may seem the obvious path to a sustainable, carbon-free transportation future, but its not the only, nor necessarily the best, path forward. The vast majority of vehicles today use the internal combustion engine (ICE), and this is unlikely to change anytime soon. Improving the ICE and its fuels-entering a new ICE age-must be a main route on the road to zero emissions.How do we go green? The future requires a balanced approach to transportation. Its not a matter of choosing between combustion or electrification; its combustion and electrification. As the authors say, "e;The future is eclectic."e; By harnessing the best qualities of both technologies, we will be in the best position to address our transportation future as quickly as possible.

**The Volvo Estate** Ashley Hollebone 2022-01-12 A dedicated publication that explains the history of the world’s most versatile station wagon, a global workhorse and comfortable family vehicle. Sweden’s answer to Germany’s people’s car arrived some 20 years earlier, and quickly paved the way for safe and dependable vehicles. This book chronicles the evolution of the Volvo estate car, with every model featured. Whether you are a Volvo lover or just have a general interest in cars, this book offers an informative and interesting look into a car that has had very little media coverage, despite its vast global sales success and the affection with which it is held by so many.

This new edition has been updated with details of the latest models in 2019.
